Helena P. Blavatsky (1831-1891) is widely celebrated as the leading esoteric thinker of the nineteenth century who influenced an entire generation of artists and intellectuals and introduced Eastern spirituality to the West. Until now, however, readers have been able to know this fascinating woman only through her public writings. Few may have realized that H.P.B. was also a tireless correspondent with family and colleagues, friends and foes, the learned and the simple. Her personal correspondence reveals for the first time the private H.P.B. in all of her sphinx-like complexity rarely visible in her published material. This unparalleled offering contains all known letters H.P.B. wrote between 1860 and the time just before she left for India in 1879. Meticulously edited by John Algeo, former President of the Theosophical Society in America and current Vice President of the international Society, the volume also contains letters to and about Blavatsky, articles, and editorial commentary.

The aviation industry is unique in two major ways: firstly, it has a long history of government involvement dating back to the early days of aviation; and secondly, its primary concern is the safety of its passengers and crew. These features highlight the importance of ethical decision-making at all levels of the industry. However, well-publicized problems such as the disappearance of Malaysia Airlines Flight 370 highlight the need for ethics to take a more prominent role in the field. *Ethical Issues in Aviation* focuses on both past and current topics in aviation, providing the reader with an overview of the major themes in aviation ethics that cover a broad range of subjects. Contributors include academics who do research in the field as well as professionals who provide first-hand accounts of the ethical situations that arise in the aviation industry. This second edition has been thoroughly revised throughout to bring it up to date, and features several new

chapters that cover recent events and topics. This book enhances student learning by providing faculty, students, and those interested in aviation with discussion of the most pressing ethical issues that continue to impact the industry.

Progress in Physics has been created for rapid publications on advanced studies in theoretical and experimental physics, including related themes from mathematics and astronomy.
