An Amateur's Guide to Observing and Imaging the Heavens is a highly comprehensive guidebook that bridges the gap between the beginners' and hobbyists' books and the many specialised and subject-specific texts for more advanced amateur astronomers. Written by an experienced astronomer and educator, the book is a one-stop reference providing extensive information and advice about observing and imaging equipment, with detailed examples showing how best to use them. In addition to providing in-depth knowledge about every type of astronomical telescope and

highlighting their strengths and weaknesses, two chapters offer advice on making visual observations of the Sun, Moon, planets, stars and galaxies. All types of modern astronomical imaging are covered, with step-by-step details given on the use of DSLRs and web-cams for solar, lunar and planetary imaging and the use of DSLRs and cooled CCD cameras for deep sky imaging.

Cephalopod Culture is the first compilation of research on the culture of cephalopods. It describes experiences of culturing different groups of cephalopods: nautilus, sepioids (*Sepia officinalis*, *Sepia pharaonis*, *Sepiella inermis*, *Sepiella japonica*, *Euprymna hyllebergi*, *Euprymna tasmanica*), squids (*Loligo vulgaris*, *Doryteuthis opalescens*,

Sepioteuthis lessoniana) and octopods (Amphioctopus aegina, Enteroctopus megalocyathus, Octopus maya, Octopus mimus, Octopus minor, Octopus vulgaris, Robsonella fontaniana). It also includes the main conclusions which have been drawn from the research and the future challenges in this field. This makes this book not only an ideal introduction to cephalopod culture, but also a valuable resource for those already involved in this topic.

A global exploration of coal geology, from production and use to chemical properties and coal petrology Coal Geology, 3rd Edition, offers a revised and updated edition of this

Relates the history of the tractor and shows the changes in design that have resulted in the diesel-powered giants of today.

Excerpt from Corn and Corn-Growing The Atlantic Coast farmers, from 1800 to 1840, made a real effort to get high yielding strains of corn. The farm papers of 1819 to 1822 tell of several instances of getting Maha (undoubtedly Omaha Indian) corn from Council Bluffs - now a part of Iowa. This corn was an eight-row soft corn type, and several of the eastern farmers claimed yields of more than 100 bushels to the acre. The Sioux yellow, ten to twelve-row flint corn was introduced from the west by several growers, and there were several introductions of a Canadian flint corn. These

introductions, together with the local varieties, are probably found to some extent in all of our present-day varieties, and help to explain the heterogeneous nature of our present-day types. The Iowa State Agricultural Society report of 1858 says: A great. Many varieties of corn are cultivated, and it would be hard to tell which is the best, as farmers entertain different Opinions. Most of the varieties were dents, according to the report. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
