Database Software. A database is a type of electronic filing system for the information used by various computer programs. Database software acts as the filing clerk for this system by keeping everything organized and storing, modifying and extracting database information. Large organizations use industrial-strength database systems like Oracle and Microsoft SQL Server.

A Beginner-Friendly Introduction to Containers, VMs and Docker

Software is a collection of data or computer instructions that tell the computer how to work. This is in contrast to physical hardware, from which the system is built and actually performs the work. In computer science and software engineering, computer software is all information processed by computer systems, programs and data. Computer software includes computer programs, libraries and related non-executable data, such as online documentation or digital media. Computer hardware and software r

Introduction to Software Testing

Extensively class tested, this text takes an innovative approach to software testing: it defines testing as the process of applying a few well-defined, general-purpose test criteria to a structure or model of the software. The structure of the text directly reflects the pedagogical approach
