The invention of photography is considered to be a scientific achievement and a great addition to the industrial world. Apart from the scientific and business perspective, it contains a great art value that represents day to day life in a frame. The artistic concept of photography was first introduced by this man named Alfred Stieglitz.

A Brief History of Photography- The Photography Timeline

Photography, as we know it today, began in the late 1830s in France. Joseph Nic é phore Ni é pce used a portable camera obscura to expose a pewter plate coated with bitumen to light. This is the first recorded image that did not fade quickly. Ni é pce's success led to a number of other experiments and photography progressed very rapidly.

History of Photography. - YouTube

In 1839, Sir John Herschel came up with a way of making the first glass negative. The same year he coined the term photography, deriving from the Greek "fos" meaning light and "grafo"—to write. Even though the process became easier and the result was better, it was still a long time until photography was publicly recognized.

A Brief History of Photography: The Beginning

1834 – H é rcules Florence, a French-Brazilian painter and the isolate inventor of photography in Brazil, coined the word photographie for his technique, at least four years before John Herschel coined the English word photography.

Timeline of photography technology - Wikipedia

The truth is, the evolution of color photography involved the moving of the medium from the highly technical environment of the laboratory and into the hands of the photographer. There were many different processes invented over the course of the following decades between 1850 and 1900.
