The concept of community development is often misunderstood, holding different meanings across different academic disciplines. Moreover, the concept of community development has been historically abstracted, not only in the way the concept has been conceptualized in academic studies, but also by the way in which practitioners use the term in the vernacular. Departing from traditional definitions of community development, this volume applies the New Public Service (NPS) perspective of Public Administration to community development to illustrate how public administrators and public managers can engage in community development planning and implementation that results in more equitable and sustainable long-term outcomes. This book will be of interest to practitioners and researchers in public administration/management, public administration theory, community development, economic development, urban sociology, urban politics, and urban planning.

Despite significant financial investments, the rate of development and pace of poverty reduction in developing and transitional countries has not always matched expectations. Development management typically involves complex interactions between governmental and non-governmental organisations, donors and members of the public, and can be difficult to navigate. This volume brings together a group of international contributors to explore the theoretical and empirical underpinnings of development management, and to consider the prospects and challenges associated with it in the context of both developing and transitional countries. Referring to dominant norms and values in public and developmental organisations, development management is tied up with the attitudes and perceptions of various stakeholders including: government officials, public sector managers, aid workers, donors and members of the public. Attempting to make sense of complex interactions between these actors is highly problematic and calls for new approaches, models and insights. Based on cutting-edge research, the chapters challenge much of the previous discourse on the subject and evaluate the challenges and opportunities that it presents. Development Management offers academics, researchers and practitioners of public administration, business and management, international development and political science a comprehensive and state-of-the-art review of current research on development management in the context of developing and transitional countries.

Offers a lucid and comprehensive account of the contributions of eminent theorists to the study of public administration and management. This textbook introduces its readers to the works of 32 esteemed thinkers in the field of administrative theories. It provides life sketches of all the thinkers along with an outline of their contributions and a critical discussion of their seminal work. With focused emphasis on individual thinkers, the book covers all the major administrative theories that have evolved over the last 600 years, such as the oriental, classical and administrative schools of thought, organizational humanism and public choice theories of administration. The impact of postmodernism, poststructuralism and the critical social theory on public administration has also been analysed in the context of their relevance to the modern world. Written as per the prescribed curriculum, the book will serve as a helpful companion for undergraduate and postgraduate students of public administration and political science as well as UGC-Net and civil services aspirants. Key Features: - Elaborate discussion on the developments and basic tenets of administrative theory - Comprehensive study, based on original texts rather than second references - Each chapter aided by review questions to assess critical understanding of the topics
