The Adobe After Effects software package was developed by Adobe to be an application to handle visual effects and motion graphics. It is mostly used in the post production process in television production and film making. It can be used for other things such as tracking, keying, animation and compositing. With these features, it can also stand as a basic non-linear editor, media transcoder and an audio editor. The After Effects software was created by the Company of Science and Art located in Providence, Rhode Island. It followed many company acquisition until the package was acquired by Adobe in 1994 with Adobe releasing its version 3.0 in the same year. This software package is used to create great animations and designs especially when combined with other software from the Creative Cloud. This also promotes collaboration between teams without any distortion or major disruptions.
