The Lab Manual provides students with the hands-on instruction necessary to prepare for the certification exam and deploy and manage Windows 7. Designed for classroom-led or self-paced study, labs complement main text content and offer a unique, practical approach to learning that is a key component to the exams. The Lab Manual includes lab activities, objectives, materials list, step-by-step procedures, illustrations and review questions. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Effectively manage Apple devices anywhere from a handful of Macs at one location to thousands of iPhones across many locations. This book is a comprehensive guide for supporting Mac and iOS devices in organizations of all sizes. You'll learn how to control a fleet of macOS clients using tools like Profile Manager, Apple Device Enrollment Program (DEP), and Apple Remote Desktop. Then integrate your Mac clients into your existing Microsoft solutions for file sharing, print sharing, Exchange, and Active Directory authentication without having to deploy additional Mac-specific middle-ware or syncing between multiple directory services. Apple macOS and iOS System Administration shows how to automate the software installation and upgrade process using the open source Munki platform and provides a scripted out-of-the box experience for large scale deployments of macOS endpoints in any organization. Finally, you'll see how to provision and manage thousands of iOS devices in a standardized and secure fashion with device restrictions and over-the-air configuration. What You'll LearnIntegrate macOS and iOS clients into enterprise Microsoft environmentsUse Apple's Volume Purchase Program to manage App installations and share pools of Apps across multiple usersMass deploy iOS devices with standard configurationsRemotely manage a fleet of macOS devices using Apple's Remote DesktopWho This Book Is For System or desktop administrators in enterprise organizations who need to integrate macOS or iOS clients into their existing IT infrastructure or set-up a new infrastructure for an Apple environment from scratch.

Updated in 2021 (Version v3.03): minor updates. For latest updates and free sample chapters, visit http://www.herongyang.com/Android.

The purpose of this book is to showcase the amazing expertise of our guest speakers at the North American MVPDays Community Roadshow. They have so much passion, expertise, and expert knowledge that it only seemed fitting to write it down in a book. MVPDays was founded by Cristal and Dave Kawula back in 2013. It started as a simple idea; “There’s got to be a good way for Microsoft MVPs to reach the IT community and share their vast knowledge and experience in a fun and engaging way” I mean, what is the point in recognizing these bright and inspiring individuals, and not leveraging them to inspire the community that they are a part of. We often get asked the question “Who should attend MVPDays”? Anyone that has an interest in technology, is eager to learn, and wants to meet other like-minded individuals. This Roadshow is not just for Microsoft MVP’s it is for anyone in the IT Community. Make sure you check out the MVPDays website at: www.mvpdays.com. You never know maybe the roadshow will be coming to a city near you. The goal of this particular book is to give you some amazing Master PowerShell tips from the experts you come to see in person at the MVPDays Roadshow. Each chapter is broken down into a unique tip and we really hope you find some immense value in what we have written.

This book will show administrators how to manage and administer the advanced functions and security features in Windows Vista. The recommendations, tips, tricks, and best practices are based on years of early-adopter implementations of Windows Vista in large corporate and private environments. The authors highlight the functions of Windows Vista that both large and small environments have found to be the most useful, including all-new features such as Complete PC Backup, BitLocker, and the powerful Group Policy options that are only available in Windows Vista. Understand how to... Integrate Windows Vista into an Active Directory domain Properly protect information for local and remote users Utilize BitLocker to encrypt all the data on a disk Properly secure a Windows Vista system Enable self-service recovery with Shadow Copy Deploy Windows Vista systems without having to touch them Deploy powerful new Group Policy settings Pick the version of Vista that is right for your users Optimize Vista performance Securely access corporate information while offline Perform image-level backup and restore of Vista workstations Andrew Abbate is a consultant in and best-selling author on various Microsoft technologies and security and operational practices. James Walker, MCSE, CPM, BSME, has been a consultant, author, and technical editor to several best-selling Windows Unleashed books involving design, security, performance optimization, and data communications. Scott G. Chimner, CISSP, MCSE, MCSA, TCSE 2, A+, is a consultant for Convergent Computing, an ISSA member, and has been in the computer industry for more than 12 years with a concentration on Information Security. Scott has also served as a contributing writer for several books on Microsoft technologies.

Are you a visual learner? Do you prefer instructions that show you how to do something—and skip the long-winded explanations? If so, then this book is for you. Open it up and you'll find clear, full-color illustrations that introduce you to computers, from working with different operating systems, applications, e-mail, and the Internet to the newest wireless devices, digital video technologies, and multimedia formats. Each task-based spread includes these great features to get you up and running on your computer in no time: Jargon-free captions that offer practical tips and tricks Succinct explanations that walk you through step by step Full-color illustrations that demonstrate each concept or task Self-contained lessons that break big topics into bite-sized modules Learn How To: Choose a computer, printer, and software Understand memory and data storage Find your way around Windows® XP or Mac OS® X Install and uninstall programs Create word documents, spreadsheets, and presentations Use multimedia applications and the Internet

Shows readers how to create PDF documents that are far more powerful than simple representations of paper pages, helps them get around common PDF issues, and introduces them to tools that will allow them to manage content in PDF, navigating it and reusing it as necessary. Original. (Intermediate).
