I wrote this book to teach people with no background in the protection industry how to not only be their own bodyguard but how to learn new skills so that they may eventually protect other people professionally. If you want to learn the business and become a Private Security or Close Protection Operator, you must learn a series of skill sets. How you gain any skill set can vary from person to person. Some people acquire the skills in the military, police or even after years of hands-on martial arts training. You do not have to become a Green Beret, Navy SEAL or CIA Contractor to acquire a series of proficient skill sets on survival, combatives or shooting. All you have to do to acquire some new skills in personal protection is to have the desire to learn and then apply what you have learned safely and with a high level of proficiency. I will pass on small pearls of wisdom throughout this book. The gems that I pass on to you have been passed on to me in many different ways throughout my life. Each jewel will be a new skill or a direction to learn. The more that you learn, the more you will understand. Any person with the passion for learning will pick up these new skills and instantly apply them. The more that you read about close protection, the more you will learn from this book. The more that you physically do, the more ingrained your skills will become into daily operational procedures. Even if you learn just one new thing from this book that saves your life, or someone else's, then it was worth learning that skill. Stay flexible in your thinking and keep an open mind as you read this book. The more you learn about yourself, the more you will want to know and apply your new skills towards your everyday life. Eventually you will be able to tie all of the pearls from this book together and become operationally proficient and stay safe in many different scenarios.

close protection. Learn tricks of the trade from a seasoned professional. The training in this book can save your life or the lives of your loved ones and clients.

...Close protection is defined as the provision of armed or unarmed specialists to protect a nominated principal from harm' - Excerpt from a Standing Committee on Army Organisation by the Director of Military Operations, dated 30 November 1979. This incredible work has been authored by the former Training Warrant Officer of the Royal Military Police (RMP) Close Protection Unit (CPU), Richard Keightley. Drawing upon extensive material, most of which has never been published before, Keightley chronicles the history of RMP Close Protection from its origins during the Second World War, through to current operations around the globe. It is a fascinating read that is as eye-opening as it is compelling. Although the forerunners of the RMP, as Military Mounted Police, Military Foot Police, Corps of Military Police and latterly the RMP, have always held responsibility for escorting senior commanders in operational theaters, and Her Majesty's Ambassadors and High Commissioners in high risk appointments abroad, it was not until the nineteen eighties that the RMP officially became the lead authority on Close Protection within the British Armed forces. Today, members of the RMP, Royal Marine Police Troop and Royal Air Force Police are deployed all around the world protecting VIPs from harm; be it the drug cartels in South America, Al Qaeda in Africa or the Taliban in Afghanistan. Whether the threat against a VIP is posed by a terrorist or criminal, the level of protection provided by the Military Police remains one of professionalism, dedication and unquestionable loyalty towards the Principal. Keightley's narrative details the discipline of Close Protection and VIP work and in doing so, strips away the mysticism to reveal the intricacies - namely relentless training, attention to detail and a high tempo of operations in the complex world of modern security. From the Northern Ireland experience through to the British Army of the Rhine (BAOR); Joint Operations and the establishment of the Close Protection Unit; training and operations including Bosnia, Iraq and Afghanistan - Keightley's vivid narrative fascinates as it illustrates the vast skill set possessed by the Red Caps of Close Protection. The wherewithal of Walking Drills, Security Advance Parties (SAPs), Residence Security Teams, (RSTs), and 'quick draws' are revealed - as are relationships with agencies such as the SAS, the Police and the Foreign & Commonwealth Office. Some of the operational incidents make for harrowing reading but through Keightley's work, the reader is shown how training and professionalism enabled the Close Protection operatives to survive car bombs, shootings and more. 'By Example We Lead' is the RMP motto and 'Deter, Suppress, Extract!' shows exactly why Read it and be inspired. There's no one finer than the men and women of the RMP's Close Protection Unit. **REVIEWS** This is an excellent account of the RMP role in delivering such protection, for civilian and military principals, from WWII to the present and across a wide range of theatres. ... Highly recommended for skirmish wargamers,

Mercenaries have been active in battle from the beginning of military history and, as private armies and military support firms, they are a major component of warfare today. Security, military advice, training, logistics support, policing, technological expertise, intelligence, transportation—all are outsourced to a greater or lesser degree in the U.S. military. However, privatization is not a uniquely American phenomenon. Countries as diverse as Saudi Arabia and Australia rely on privatization in one form or another. Historically, heads of state, politicians, and other administrators have justified use of mercenaries on the basis of their effectiveness, and cost-savings. These reasons and others continue to serve as rationales for use of private military companies in military strategy. *Mercenaries: A Guide to Private Armies and Private Military Companies* provides a comprehensive survey and guide to mercenary forces, entrepreneurs, and corporations active on the international military scene today, including a concise history of mercenaries and private armies on land, sea, and in the air. Narrative chapters are amply supplemented by sidebars including biographies of major figures, key statistics, historical and current documents, contracts, and legislation on private armies and outsourced military services. Each chapter includes a bibliography of books, journal articles, and web sites, and a general bibliography concludes the entire work.
