This volume emphasizes the role of chemical education for development and, in particular, for sustainable development in Africa, by sharing experiences among specialists across the African continent and with specialists from other continents. It considers all areas and levels of chemistry education, gives specific attention to known major challenges and encourages explorations of novel approaches. The chapters in this book describe new teaching approaches, approach-explorations and in-class activities, analyse educational challenges and possible ways of addressing them and explore cross-discipline possibilities and their potential benefits for chemistry education. This makes the volume an up to date compendium for chemistry educators and educational researchers worldwide.

The German missionary Carl Strehlow (1871-1922) had a deep ethnographic interest in Aboriginal Australian cosmology and social life which he documented in his 7 volume work Die Aranda- und Loritja-Stämme in Zentral-Australien that remains unpublished in English. In 1913, Marcel Mauss called his collection of sacred songs and myths, an Australian Rig Veda. This immensely rich corpus, based on a lifetime on the central Australian frontier, is barely known in the English-speaking world and is the last great body of early Australian ethnography that has not yet been built into the world of Australian anthropology and its intellectual history. The German psychological and hermeneutic traditions of anthropology that developed outside of a British-Australian intellectual world were alternatives to 19th century British scientism. The intellectual roots of early German anthropology reached back to Johann Gottfried Herder (1744-1803), the founder of German historical particularism, who rejected the concept of race as well as the French dogma of the uniform development of civilisation. Instead he recognised unique sets of values transmitted through history and maintained that cultures had to be viewed in terms of their own development and purpose. Thus, humanity was made up of a great diversity of ways of life, language being one of its main manifestations. It is this tradition that led to a concept of cultures in the plural.

Cornell University is fortunate to have as its historian a man of Morris Bishop's talents and devotion. As an accurate record and a work of art possessing form and personality, his book at once conveys the unique character of the early university—reflected in its vigorous founder, its first scholarly president, a brilliant and eccentric faculty, the hardy student body, and, sometimes unfortunately, its early architecture—and establishes Cornell's wider significance as a case history in the development of higher education. Cornell began in rebellion against the obscurantism of college education a century ago. Its record, claims the author, makes a social and cultural history of modern America. This story will undoubtedly entrance Cornellians; it will also charm a wider public. Dr. Allan Nevins, historian, wrote: "I anticipated that this book would meet the sternest tests of scholarship, insight, and literary finish. I find that it not only does this, but that it has other high merits. It shows grasp of ideas and forces. It is graphic in its presentation of character and idiosyncrasy. It lights up its story by a delightful play of humor, felicitously expressed. Its emphasis on fundamentals, without pomposity or platitude, is refreshing. Perhaps most important of all, it achieves one goal that in the history of a living university is both extremely difficult and extremely valuable: it recreates the changing atmosphere of time and place. It is written, very plainly, by a man who has known and loved Cornell and Ithaca for a long time, who has steeped himself in the traditions and spirit of the institution, and who possesses the enthusiasm and skill to convey his understanding of these intangibles to the reader." The distinct personalities of Ezra Cornell and first president Andrew Dickson White dominate the early chapters. For a vignette of the founder, see Bishop's description of "his" first buildings (Cascadilla, Morrill, McGraw, White, Sibley): "At best," he writes, "they embody the character of Ezra Cornell, grim, gray, sturdy, and economical." To the English historian, James Anthony Froude, Mr. Cornell was "the most surprising and venerable object I have seen in America." The first faculty, chosen by President White, reflected his character: "his idealism, his faith in social emancipation by education, his dislike of dogmatism, confinement, and inherited orthodoxy"; while the "romantic upstate gothic" architecture

of such buildings as the President's house (now Andrew D. White Center for the Humanities), Sage Chapel, and Franklin Hall may be said to "portray the taste and Soul of Andrew Dickson White." Other memorable characters are Louis Fuertes, the beloved naturalist; his student, Hugh Troy, who once borrowed Fuertes' rhinoceros-foot wastebasket for illicit if hilarious purposes; the more noteworthy and the more eccentric among the faculty of succeeding presidential eras; and of course Napoleon, the campus dog, whose talent for hailing streetcars brought him home safely—and alone—from the Penn game. The humor in *A History of Cornell* is at times kindly, at times caustic, and always illuminating.

Advanced Inorganic Chemistry - Volume II is a concise book on basic concepts of inorganic chemistry. Beginning with Coordination Chemistry, it presents a systematic treatment of all Transition and Inner-Transition chemical elements and their compounds according to the periodic table. Special topics such as Pollution and its adverse effects, chromatography, use of metal ions in biological systems, to name a few, are discussed to provide additional relevant information to the students. It primarily caters to the undergraduate courses (Pass and Honours) offered in Indian universities.

With careers spanning eight decades, William Hanna and Joseph Barbera were two of the most prolific animation producers in American history. In 1940, the two met at MGM and the result was the Tom and Jerry duo, whose antics made up for whatever words weren't actually spoken. The cat and mouse creation earned 14 Academy Award nominations and seven wins. The emergence of television led to the founding of Hanna-Barbera's legendary studio that produced hundreds of hours of cartoons, with beloved characters from Fred Flintstone and Scooby Doo to the Super Friends and the Smurfs. Prime-time animated sitcoms, Saturday morning cartoons, and Cartoon Network's cable animation are some of the many areas of television revolutionized by the team, and their resulting productions are critical to our cultural history, reflecting ideologies and trends in both media and society. This book offers a complete company history and examines its productions' influences, changing technologies, and enduring cultural legacy.
