Pakistan is a developing country and agriculture is the mainstay of its economy. About 67.5% of country's population living in rural areas is directly or indirectly involved in agriculture. It provides employment to more than 48% of country's work force. This sector not only fulfills the human food and animal feed requirements of the country but also provides raw material to its agro-based industries. In the foreign trade, it is agriculture, which dominates through exports of raw commodities like rice, cotton and fruits; semi processed and processed products like cotton yarn, cloth, carpets and leather products. To improve agricultural production through effective dissemination of agricultural technology, various extension approaches have been tried from time to time including commodity specialized approach. The present study was designed to investigate into the working of commodity specialized extension approach followed by sugar mills in Faisalabad.

Indira's Objective Agriculture for competitive exams in agriculture discipline contain 21 chapters covering all related discipline. This book will fulfill the requirement of students of agriculture and agricultural extension stream for appearing in different competitive examinations.

Agricultural Extension Reforms in South Asia: Status, Challenges, and Policy Options is based on agricultural extension reforms across five South Asian countries, reflecting past experiences, case studies and experiments. Beginning with an overview of historical trends and recent developments, the book then delves into country-wise reform trajectories and presents several cases testing the effectiveness of different types (public and private) and forms (nutrition extension, livestock extension) of extension systems. Further, the book provides a comprehensive overview of challenges and constraints faced in formulating and implementing reforms, tying the results into a concrete set of lessons and highlighting areas that require further research. In addition, the book discusses how a major aspect of agricultural development is the productivity increase from the knowledge base of farmers, and how translating research results into a knowledge base for farmers requires designing and implementing well-functioning extension programs. Presents the current challenges and solutions by region, and provides insights for application in global settings Provides key foundational information for the effective and efficient design of future intervention programs Includes workshops and presentations based on real-world research of specific aspects of extension systems and provision of advisory and consultation services to various governments

This publication reviews key trends and policy developments aimed at reforming agricultural extension systems, in order to address issues of food security, poverty alleviation and rural sustainable development. It highlights the importance of the public sector in promoting rural development through extension and communication. A number of recommendations are made for developing countries, which seek to encourage institutional reforms and dialogue among diverse providers of extension services, all aimed at advancing livelihoods and income generation of poor rural people.

A food system comprises the entire range of actors and interlinked activities related to food production, processing, distribution, marketing and trade, preparation, consumption, and disposal. When a food system operates without compromising the needs of future generations, it is considered to be a " Sustainable Food System. " The present-day food systems in Sri Lanka are diverse, and the natural and physical environment, infrastructure, institutions, society and culture, and policies and regulations within which the food systems operate, as well as the technologies employed, have shaped their outcomes. Agricultural research is a key factor in terms of innovation and technological advances. Innovation has been the main driver of food systems' transformation over the past few decades and will be critical to addressing the needs of a rapidly growing population in a context of climate change and scarcity of natural resources. In addition, agricultural research must help meet the rising demand for food at affordable prices. Comprising 17 chapters written by specialist(s) in their respective subject-areas, this Contributed Volume on " Agricultural Research for Sustainable Food Systems in Sri Lanka: A Historical Perspective " shares the scientific knowledge accumulated by the National Agricultural Research System of Sri Lanka, including universities, and offers recommendations on how to make food systems more sustainable in order to address the current needs of Sri Lankan society. It presents perspectives on four key thematic areas, namely: (i) Crop and animal production, management, and improvement, (ii) Agro-product processing technologies, (iii) Natural resource management, and (iv) Socio-economic development and agri-business management.

The knowledge on Agriculture is continuously improved, updated, and disseminated. It is also important that the review and inventory of the ' State of the Art ' in agriculture objectives questions and best practices should be shared widely among agriculture practitioners, educators and scholars. Through Competitive Examinations, there is direct recruitment for admission and high position in our education system; the pattern followed is M.C.Q ' s or Objective type questions in such examinations. The book is a repository of more than 6,000 objective questions; which calls for quick answering for success within a specified period in the examinations. A sincere effort has been made by different authors to present them in most easy, short and understandable language for the benefit of students, teachers and those who are interested in Agriculture and Agricultural Extension. Majorly, all different aspects of Agriculture Discipline are provided in the book, which are a part of various Agricultural Universities syllabi. This book will be of great service, to the students aiming for higher level competitive examination such as NET, ARS, JRF, SRF, UG and PG entrance examinations.
