Oregon's Bootleg Fire may not be contained for another two weeks, according to the California Independent System Operator.

A practical and delicious field guide to cooking and healing with adaptogens from wellness expert and former chef Amanda Chantal Bacon, founder of Moon Juice and author of *The Moon Juice Cookbook* In *The Moon Juice Manual*, Amanda Chantal Bacon lays out the blueprint for the next level of mind-body health. This is the quintessential guide to adaptogens, the stress-busting super-herbs and -mushrooms that Bacon introduced to the wellness world with her cult-followed Moon Dust collection. As the name suggests, adaptogens are plants that can help us adapt to and protect ourselves from the daily stress of modern life. From cordyceps (a mushroom to elevate energy and libido) to ashwagandha (a shrub to tame anxiety and reduce inflammation), adaptogens are a powerful, edible antidote to today's stressed-out, high-speed world. A plant-fueled survival guide to modern life, *The Moon Juice Manual* explains the way chronic stress impacts the mind and body and provides simple and delicious ways to incorporate adaptogens into daily life. The book offers prescriptive recommendations and functional recipes for optimizing beauty, brain, spirit, sex, sleep, or mood. Readers will understand how to make grain-free and practical recipes with adaptogens along with easy, decadent treats like Horny Goat Weed Brownies and Schisandra Sleeping Beauty Balls. *The Moon Juice Manual* makes cooking and healing with adaptogens fun, approachable, and truly transformative.

Automatic AOD, BW 35/40, LE85/91/93/95/97, C4, C5, C6, C9, C10, FMX and M51. Manual 3 speed, 4 speed and 5 speed single rail, Top Loader, T5 and M57. Step by step instructions for a pull down and rebuild. Includes specifications, torque settings, problem diagnosis, shift speeds plus more information. This book is from an Australian publisher, and covers both American and Australian applications.

This book addresses issues associated with the interface of computing, optimisation, econometrics and financial modeling, emphasizing computational optimisation methods and techniques. The first part addresses optimisation problems and decision modeling, plus applications of supply chain and worst-case modeling and advances in methodological aspects of optimisation techniques. The second part covers optimisation heuristics, filtering, signal extraction and time series models. The final part discusses optimisation in portfolio selection and real option modeling.
