Published in 1970, this important work interprets the poem with a focus on the idiosyncrasies of its originally oral composition. In part I, the main themes of the Odyssey such as ' guest-friendship ' and ' testing ' are investigated. The incorporation of these and other themes, such as ' omens ' and the ' homecomings of the Achaeans ' , into the dramatic construction of the whole epic is also examined. In Part II, the main characters of the Odyssey are described: the Suitors, Telemachus, Odysseus and Penelope. So too are Theoclymenus and Laertes, whom traditional criticism has maligned or disregarded. The analysis of the characters tries to illumine features which are challenging for the contemporary reader. In the conclusion, the ' plan ' of the Odyssey is reconstructed. The author argues that it would probably have been performed over the course of three days: two sessions each day, with each recitation maintaining its own artistic unity.

Comprehensive commentaries on the Homeric texts abound, but this commentary concentrates on one major aspect of the Odyssey--its narrative art. The role of narrator and narratees, methods of characterization and scenery description, and the development of the plot are discussed. The study aims to enhance our understanding of this masterpiece of European literature. All Greek references are translated and technical terms are explained in a glossary. It is directed at students and scholars of Greek literature and comparative literature.

In the second volume, the commentaries by Heubeck (Books IX-XII) and Hoekstra (Books XIII-XVI) are both preceded by introductions, with Hoekstra paying special attention to diction in the Odyssey and the tradition of epic diction in general. The introductions and commentary have been thoroughly revised and adapted to the text of T. W. Allen in the Oxford Classical Text series.

Also included is a pronunciation glossary and character index.
