Big on the outside, a full 208 inches long, a real pocket battleship to do battle with the 207-inch 7-series and the (also) 208-inch Audi A8. This new ... sensitive seat diagram on the door ...

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

This Handbook is the first comprehensive survey of a rapidly expanding sub-field in archaeology, the study of the present and recent past. It seeks to explore the boundaries of this emerging area, to develop a tool-kit of concepts and methods, which are applicable to this new sub-field, and to suggest important future trajectories for research.

Luis Martín Díaz shows why some companies are still reluctant to cooperate with partners in the supply chain even though it may be advantageous to them. Based on an extensive survey within the European automotive industry, he proposes solutions to this paradox and

describes a prototype for the assessment of the added-value of cooperation.

The need for light-weight materials, especially in the automobile industry, created renewed interest in innovative applications of magnesium materials. This demand has resulted in increased research and development activity in companies and research institutes in order to achieve an improved property profile and better choice of alloy systems. Here, development trends and application potential in different fields like the automotive industry and communication technology are discussed in an interdisciplinary framework.
