Form, Art and the Environment: Engaging in Sustainability adopts a pluralistic perspective of environmental artistic processes in order to examine the contributions of the arts in promoting sustainable development and culture at a grassroots level and its potential as a catalyst for social change and awareness. This book investigates how community arts, environmental creativity, and the changing role of artists in the Polis contribute to the goal of a sustainable future from a number of interdisciplinary perspectives. From considering the role that art works play

in revealing local environmental problems such as biodiversity, public transportation and energy issues, to examining the way in which artists and art works enrich our multidimensional understanding of culture and sustainable development, Form, Art and the Environment advocates the inestimable value of art as an expressive force in promoting sustainable culture and conscious development. Utilising a broad range of case studies and analysis from a body of work collected through the international environmental COAL prize, this book examines the evolution of the relationship between

culture and the environment. This book will be of interest to practitioners of the environmental arts, culture and sustainable development and students of Art, Environmental Science, and International Policy and Planning Development.

How do we make building sustainable and fit for the future? The book presents a strategy for tackling the construction industry's future challenges from the perspective of the organizing architect, and with a view to the interdisciplinary knowledge, capable of integration, of related disciplines. With a

profound insight into the operative processes, the author analyses the complex mechanisms of the system that affect the whole of society and often follow very traditional process structures. He investigates the interaction between the stakeholders' actions in the construction process and the framework conditions and, on that basis, develops a strategy which—itself a process—computes the elements of the intended target state.

Has a new political ideology emerged in the aftermath of the Sixties? Gayil Talshir examines the ideological evolution of green parties in Britain and Germany and traces the formation and transformations of a new type of ideology - a modular ideology. In the 1980s, the 'extraordinary opposition', New

Left and ecology movements developed, a distinct and social vision that paved the political road for the transformation of democracy. Talshir explores this journey from the politics of nature to changing the nature of politics.

Joseph Beuys is one of the most important and controversial German artists of the late twentieth century, an artist whose persona and art is so tightly interwoven with Germany's fascist past—Beuys was, after all, a former soldier in the Third Reich—that he has been a problematic figure for postwar and

post-reunification Germany. In illuminating the centrality of trauma and the sustained investigation of the notion of art as the two defining threads in Beuys's life and art, this book offers a critical biography that deepens our understanding of his many works and their contribution. Claudia Mesch analyzes the aspects of Beuys's works that have most offended audiences, especially the self-woven legend of redemption that many have felt was a dubious and inappropriate fantasy for a former Nazi soldier to engage. As she argues, however, Beuys's self-mythology confronted post-traumatic life head

on, foregrounding a struggle for psychic recovery. Following Beuys's exhibitions in the 1970s, she traces how he both expanded the art world beyond the established regional centers and paved the way for future artists interested in activism-as-art. Exploring Beuys's expansive conceptions of what art is and following him into the realms of science, politics, and spirituality, Mesch ultimately demonstrates the ways that his own myth-making acted as a positive force in the Germany's postwar reckoning with its past.

The book discusses how culture simultaneously

shapes and is shaped by the economy. Over the past few years, as the world has staggered from one financial crisis to another, the neat separation of economics and culture has been consistently challenged. To understand the current state of affairs, it has become increasingly necessary to understand the conjuncture that rules the production of value in economic systems, how money shapes social relations and affects discursive practices. By discussing the vocabulary, by understanding the rhetoric and interpreting the narratives, be it of crisis, austerity, growth, welfare, neo-liberalism or socialism,

new modes of imaging the economic system may be made possible. The book is structured in four chapters dealing with theory and conjuncture (“Philosophies of Money”), with the visual arts and investment (“The Arts and Finance”), with literary representation and narrativity (“Literature and Money Matters”) and with the cognitive impact of fiduciary representation (“Cognitive Moneyscapes”). This collection analyses the process whereby a material icon invested with the symbolical power to rule social exchange becomes an explanatory narrative determining the way societies produce meaning.

In recent decades, environmental issues have increasingly been incorporated into liberal democratic thought and political practice. Environmentalism and ecologism have become fashionable, even respectable schools of political thought. This apparently successful integration of environmental movements, issues and ideas in mainstream politics raises the question of whether there is a future for what once was a counter-movement and counter-ideology. Liberal Democracy and Environmentalism provides a reflective assessment of recent developments, social

relevance and future of environmental political theory, concluding that although the alleged pacification of environmentalism is more than skin deep, it is not yet quite deep enough. This book will appeal to students and researchers of social science and philosophers with an interest in environmental issues.
