Cells are the basic unit of life. Genes are the basic units for passing traits from parent to offspring. Evolution by natural selection is the process that has led to the great diversity of species on Earth. Living things

Online Library Basic Biology Study Guide

maintain the environment within their cells and bodies. Living things have the ability to acquire and transform energy.

Introduction to Biology | Basic Biology

The purpose of this study guide is to introduce you to biology and its

Online Library Basic Biology Study Guide

development as a life science.
This guide will provide you with insight
into the building blocks of biology and
the links between these
blocks. The role of cells in
living organisms will be explored as
well as the interrelatedness of all the
building blocks of biology.
