Buku ini terdiri dari sebelas bab yang meliputi Informasi Geografis dan Geospasial, Konsep Dasar Sistem Informasi Geografis, Pengumpulan Data Informasi Spasial, Pengenalan Survei dan GPS, Webgis dan Arcgis Online, Pembuatan WebGIS Berbasis ArcGIS Online Studi Kasus Sebaran Covid-19 Kota Palopo, GPS Essentials, Fitur-Fitur GPS Essentials, Penggunaan Kompas, Fitur Waypoint, Tracking. Buku ini diharapkan dapat dijadikan sebagai salah satu referensi bagi kalangan umum maupun mahasiswa terutama yang berkaitan dengan SIG. Buku ini juga dapat dijadikan sebagai bahan bacaan dan bahan ajar pada perguruan tinggi untuk penambah wawasan dalam menggambarkan dan menganalisis suatu wilayah secara spasial.

Buletin Poltanesa is a collection of research articles, scientific works, and dedication from all academic community in order to integrate information. Buletin Poltanesa provides open publication services for all members of the public, both in all tertiary educational and teacher environments and other research institutions, with the freedom to exchange information that is dedicated to facilitating collaboration between researchers, writers and readers through information exchange. Buletin Poltanesa was introduced and developed in Research Department of Politeknik Pertanian Negeri Samarinda Buletin Poltanesa is published periodically twice a year, in June and December, this bulletin contains the results of research activities, discoveries and ideas in the field all multidisciplinary sciences. Hopefully with the articles in cultivation researchers can share knowledge in order to advance Indonesia, especially East and North Borneo.

Buku ajar ini berisi materi perkuliahan: pengertian dasar SIG, sejarah yang melatarbelakangi SIG untuk kesehatan, basis data spasial bidang kesehatan, memetakan informasi kesehatan, analisis kejadian kesehatan berdasarkan klaster, analisis risiko dan penyebaran penyakit menular, analisis akses pelayanan kesehatan yang disusun oleh Noor Alis Setiyadi, S.KM., M.KM., Dr.PH dan analisis masalah lingkungan kesehatan yang disusun oleh Sri Darmoto, S.KM., M.PH serta data spasial, praktik perangkat lunak dalam menggunakan SIG kesehatan yang disusun oleh Miftahul Arozaq, S.Si, M.Pd . Capaian pembelajaran: a. Menjelaskan latar belakang SIG di bidang kesehatan termasuk manfaatnya berdasarkan evidence. b. Menjelaskan ragam basis data spasial yang digunakan di bidang kesehatan. c. Melakukan pemetaan informasi kesehatan dengan sudut pandang SIG. d. Menjelaskan analisis masalah kesehatan berdasarkan klaster. e. Menjelaskan peran SIG dalam analisis risiko dan penyebaran penyakit menular. f. Menjelaskan peran SIG dalam analisis akses pelayanan kesehatan. g. Menjelaskan peran SIG dalam analisis kesehatan lingkungan. h. Mengerti dan mampu mempraktikkan perangkat lunak SIG di bidang kesehatan.

Penekanan dalam buku ajar ini lebih menguraikan terkait materi survey dan pemetaan kehutanan yang mendukung capaian pembelajaran matakuliah (CPMK) “Sistem Informasi Spasial Kehutanan”, diantaranya: 1) Mampu melakukan teknik konstruksi dan rekonstruksi kondisi lapang dalam penataan hutan 2) Mampu memahami dan terampil dalam mempresentasikan hasil analisis project peta. 3) Mampu memahami dan terampil dalam presentasekan hasil analisis project peta Capaian pembelajaran yang diuraikan dalam matakuliah “Sistem Informasi Spasial Kehutanan” kemudian menjadi acuan dalam mengembangkan beberapa materi yang mendukung capaian tersebut yang dituangkan dalam buku ajar ini. Kesesuaian materi yang diuraikan dalam buku ajar ini, disesuaikan dengan beberapa capaian pembelajaran yang terkait dengan analisis spasial pada rencana pembelajaran semester (RPS) matakuliah “Sistem Informasi Spasial Kehutanan”.

Python Scripting for ArcGIS Pro is the definitive, easy-to-follow guide to writing useful Python code with spatial data in ArcGIS Pro, whether you're new to programming or not.

Ilmu tentang pembuatan peta dikenal dengan istilah kartografi, namun kartografi saat ini didefinisikan lebih luas lagi sebagai penyampaian informasi geospasial mulai dari pengambilan data, pengolahan data hingga ditampilkan dalam bentuk peta. (Menho-Jan Kraak dan Ferjan Ormeling, 2007). Penyajian informasi pun lebih banyak ditampilkan melalui suatu peta sebagai hasil pencerminan secara sistematis dari suatu kondisi di bumi yang merupakan hasil utama dari analisis kartografi. Kartografi secara detail banyak dilakukan pada studi bidang Geodesi, namun penggunaan analisis kartografi telah digunakan diberbagai ilmu mulai dari ilmu pengetahuan alam hingga ilmu mengenai sosial ekonomi, dan budaya. Perubahan tentang ilmu kartografi karena pengaruh perkembangan ilmu pengetahuan itu sendiri. Perkembangan ilmu pengetahuan mengikuti perkembangan teknologi yang sangat pesat. Perkembangan teknologi yang terjadi dari waktu ke waktu menjadi penyebab perubahan cakupan dari kartografi. Saat ini kartografi tidak hanya sebatas pembuatan peta saja tetapi juga penggunaan dan analisa peta. Sehingga kartografi memiliki cakupan ilmu yaitu mengumpulkan dan menganalisis data dari pengukuran berbagai unsur permukaan bumi serta menyatakannya secara grafis dengan skala tertentu agar unsur-unsur tersebut terlihat jelas dan mudah dipahami. Perkembangan kartografi yang diintegrasikan dengan teknologi komputer yang di tandai semakin berkembangnya juga perangkat lunak Sistem Informasi Geografis (SIG)/Geographic Information System (GIS) (Gambar 1). Perangkat SIG [2] pun telah dikenal diberbagai kalangan dari berbagai latar belakang mampu merasakan manfaat dari kecanggihan teknologi tersebut. Pemakaian gadget yang disertai aplikasi berbasis online telah dilengkapi dengan Global Positioning System (GPS) menjadikan SIG sebagai informasi dan kebutuhan yang tidak dapat dipisahkan dari kebutuhan sehari-hari masyarakat pada umumnya.Sistem Informasi Geografis (SIG) dimaksudkan sebagai “an integrated collection of computer software and data used to view and manage information about geographic places, analyse spatial relationships and model spatial processes”. Hal ini dimaksudkan bahwa penggunaan SIG berbasis komputer dalam mengelola informasi terkait letak geografis dan keterkaitan pada analisis spasialnya. SIG dapat melakukan pengintegrasian informasi dari berbagai sumber sehingga mengeluarkan analisis yang komprehensif. Pemanfaatan teknologi SIG dalam analisis spasial telah mendukung banyak hal dalam bidang kehutanan diantaranya inventarisasi hutan, perencanaan hutan, analisis kesesuaian lahan, analisis bencana, perencanaan wilayah kehutanan, tata ruang wilayah dan masih banyak penggunaan lainnya. Banyaknya manfaat analisis spasial dalam bidang kehutanan tersebut, menjadi landasan utama pentingnya pengetahuan dan keterampilan ini sangat perlu dimiliki oleh lulusan Fakultas Kehutanan Universitas Hasanuddin. Dimana keterampilan ini akan menjadi bekal bagi para lulusan dalam membentuk karakter keahlian di dunia kerja yang mendukung konsep pembangunan berkelanjutan, sebagaimana yang menjadi tujuan dari terbentuknya program studi Kehutanan Fakultas Kehutanan yakni berperan secara aktif dalam pengembangan dan pemanfaatan ilmu pengetahuan, teknologi dan seni di bidang kehutanan dan lingkungannya serta mengembangkan dan memanfaatkan ilmu pengetahuan, teknologi dan seni dalam bidang kehutanan melalui penyelenggaraan program-program pendidikan, penelitian, dan pengabdian pada masyarakat yang secara keseluruhan diperuntukkan bagi terwujudnya pengelolaan hutan berkelanjutan. Penekanan dalam buku ajar ini lebih menguraikan terkait materi Pemetaan dan Kartografi yang akan mendukung capaian pembelajaran mata kuliah (CPMK) “Sistem Informasi Spasial Kehutanan”, diantaranya: 1. Memahami konsep dasar pemetaan dalam bidang kehutanan untuk mencapai hutan secara lestari. 2. Mampu mendeskripsikan standar dalam melakukan pengukuran . 3. Mampu dan memahami standar peta yang digunakan dalam bidang kehutanan. 4. Mampu mendeskripsikan informasi yang penting dalam suatu peta 5. Mampu dan memahami software atau perangkat lunak dalam pemetaan bidang kehutanan

Create, optimize, and deploy stunning cross-browser web maps with the OpenLayers JavaScript web mapping library.

Which one of the following two offers is more appealing to you? Making a 70% return on an easy to understand, short time investment;Joining a coin-tossing game in which when you loose you pay 1 euro and when you win you gain 70 cents. Most people take the first offer and stay away from the second one. And yet ... they are basically the same! Welcome to the wonderful dual world of Binary Options! You can play binary options merely for entertainment and have great fun.You might even win a lot of money, provided that you get lucky and do not stay long, just like in Vegas... Or, you can trade binary options for fun and profit. This is what this book is about: it is a practical step-by-step guide that shows you how to trade systematically, how to identify profitable trading strategies, and how to select and use a sound money management system. In short, how to have fun and make money! Trading Binary Options for Fun and Profit: A Guide for Speculators walks you through what you need to know and do to trade binary options profitably. Since this it is not a work of fiction you will not be shown the magic formula that will make you rich in the blink of an eye. Rather you will gain the fundamental knowledge and tools needed to become a successful trader. You will learn to develop your own strategies for trading binary options profitably. Actually, a lot of what is covered here is easily adaptable to other types of trading such as the stock and Forex markets and even to sports betting. That said you do not need to have any prior knowledge of binary options, trading or math. Just start reading at the beginning and proceed sequentially. All what you will need to know is clearly spelled out. If you happen to have previous knowledge of a topic you can proceed directly to the next one without losing context. However if you are in doubt it is better to read through. This book is fluff free so it won't waste your time. Trading Binary Options for Fun and Profit: A Guide for Speculators starts by defining what a binary option is and how it works, the main types of trades available and the criteria you may want to consider when selecting a binary options broker. Then it proceeds to explain why using trading strategies makes sense and where you can find ideas to create or adapt them. Ultimately you will want to know if your trading strategy makes money so it also shows you how to calculate the magic number that tells it all: its Expectancy. Since trading strategies are built upon technical indicators a very brief overview of Technical Analysis follows and some very common indicators are presented. Next explains the MetaTrader platform and shows you how it can serve as your own cost-free research assistant and trading signal provider. It then goes over the details of developing and improving a trading strategy using Excel and Expert Advisors (no programming knowledge needed). Money Management comes next: you will get to know several systems and in the process learn how easy it is to do a Monte Carlo simulation to test them (or to test anything else). The book ends with an overview of the complete methodology and leaves you with some final trading suggestions. Finally, in the Appendixes you will find several resources that are made available for free to the buyers of this book: Six spreadsheets containing templates for the Martingale, Paroli, D'Alembert, Fibonacci, Percentage of Bankroll and Kelly money management systems; Examples of trading strategies that backtested with winning percentages above 60%; An Expert Advisor that pops-out an alert window and plays a sound on MetaTrader each time a new trade is opened.

Foreword -- Preface -- Lesson 1. Frame the problem and explore the study area -- Lesson 2. Preview the data -- Lesson 3. Choose the data -- Lesson 4. Build the database -- Lesson 5. Edit the data -- Lesson 6. Conduct the analysis -- Lesson 7. Automate the analysis -- Lesson 8. Present your analysis results -- Lesson 9. Share your results online

Bilingual children's book (English - Indonesian, age 2 and up) Tim can't fall asleep. His little wolf is missing! Perhaps he forgot him outside? Tim heads out all alone into the night - and unexpectedly encounters some friends..."Sleep Tight, Little Wolf" is a heart-warming bedtime story. It has been translated into more than 50 languages and is available as a bilingual edition in all conceivable combinations of languages. www.childrens-books-bilingual.com Buku anak-anak dengan dwibahasa (untuk 2 tahun keatas) Tim tidak bisa tidur. Serigala kecilnya hilang! Apakah mungkin Si Serigala Kecil tertinggal di luar? Seorang diri, Tim keluar di malam hari - dan tanpa disangka bertemu dengan beberapa teman. "Tidurlah yang Nyenyak, Serigala Kecil" merupakan cerita pengantar tidur yang menghangatkan hati. Cerita ini sudah diterjemahkan ke dalam 50 bahasa dan tersedia dalam berbagai kombinasi dua bahasa. www.childrens-books-bilingual.com
