A transnational analysis with an emphasis on gender examines the work of women writers from both sides of the border writing in Spanish, English, or a mixture of the two languages whose work questions the accepted notions of border identities.

This diverse resource on renewable energy and sustainable technologies highlights the status, state of the art, challenges, advancements and options in areas such as energy recovery systems, turbine ventilators, green composites, biofuels and bio-resources for energy production, wind energy, integrated energy-efficient systems, thermal energy storage, natural ventilation & day-lighting systems, and low carbon technologies for building and environmental applications. It is designed to serve as a reference book for students, researchers, manufacturers and professionals working in these fields. The editors have gathered articles from world-leading experts that clearly illustrate key areas in renewable energy and sustainability. The distinct role of these technologies in future endeavors is stressed by taking into account the opportunities to contribute with new approaches, methods and directions for building and environmental applications. The in-depth discussion presented in this book will give readers a clear understanding of every important aspect of each technology's applications, optimum configuration, modifications, limitations and their possible improvements.

Online Activism in Latin America examines the innovative ways in which Latin American citizens, and Latin@s in the U.S., use the Internet to advocate for causes that they consider just. The contributions to the volume analyze citizen-launched websites, interactive platforms, postings, and group initiatives that support a wide variety of causes, ranging from human rights to disability issues, indigenous groups' struggles, environmental protection, art, poetry and activism, migrancy, and citizen participation in electoral and political processes. This collection bears witness to the early stages of a very unique and groundbreaking form of civil activism culture now growing in Latin America.

Analyses the biology, ecology and geographical distribution of lime trees, using extensive field data to clarify their notoriously confusing taxonomy.

Given the frequent movement of commercial plants outside their native location, the consistent and standard use of plant names for proper identification and communication has become increasingly

important. This second edition of *World Economic Plants: A Standard Reference* is a key tool in the maintenance of standards for the basic science underlyin

This book provides the first comprehensive study of narco cinema, a cross-border exploitation cinema that, for over forty years, has been instrumental in shaping narco-culture in Mexico and the US borderlands. Identifying classics in its mammoth catalogue and analyzing select films at length, Rashotte outlines the genre's history and aesthetic criteria. He approaches its history as an alternative to mainstream representation of the drug war and considers how its vernacular aesthetic speaks to the anxieties and desires of Latina/o audiences by celebrating regional cultures while exploring the dynamics of global transition. Despite recent federal prohibitions, narco cinema endures as a popular folk art because it reflects distinctively the experiences of those uprooted by the forces of globalization and critiques those forces in ways mainstream cinema has failed.

Nicaragua: Emerging from the Shadow of the Eagle details the country's unique history, culture, economics, politics, and foreign relations. Its historical coverage considers Nicaragua from pre-Columbian and colonial times as well as during the nationalist liberal era, the U.S. Marine occupation, the Somoza dictatorship, the Sandinista revolution and government, the conservative restoration after 1990, and consolidation of the FSLN's power since the return of Daniel Ortega to the presidency in 2006. The thoroughly revised and updated sixth edition features new material covering political, economic, and social developments since 2011. This includes expanded discussions on economic diversification, women and gender, and social programs. Students of Latin American politics and history will learn the how the interventions by the United States 'the eagle' to 'the north' have shaped Nicaraguan political, economic, and cultural life, but also the extent to which Nicaragua is increasingly emerging from the eagle's shadow.

The book provides an overview of current trends in biotechnology and medicinal plant sciences. The work includes detailed chapters on various advance biotechnological tools involved in production of phytoactive compounds of medicinal significance. Some recent and novel research studies on therapeutic applications of different medicinal plants from various geographical regions of the world have also been included. These studies report the antimicrobial activity of various natural plant products against various pathogenic microbial strains. Informative chapters on recent emerging applications of plant products such as source for nutraceuticals and vaccines have been integrated to cover latest advances in the field. This book also explores the conservation aspect of medicinal plants. Thus, chapters having comprehensively compiled in vitro conservation protocols for various commercially important rare,
