Trading above the recent high at \$584 would boost the price above \$600. Moreover, this feels like a conservative prediction based on the immense support ahead of the smart contract giant. The bullish narrative will be invalidated if Ethereum closed the day under \$550. On the downside, the next short-term support lies at \$520.

~~Ethereum long target at \$600 after establishing support ...~~

For most Ethereum based ICO, they provide a ether public key to contribute, Copy the key and paste it in Ethereum BlockChain Explorer and Search and you can see all the contribution. And see the tab “Contract Source” and read the code. Attached the screenshot of tezos smart contract for the ICO crowdsale. 3.1K views
