2.1 The grammar of graphics. We start with a discussion of a theoretical framework for data visualization known as "the grammar of graphics." This framework serves as the foundation for the ggplot2 package which we'll use extensively in this chapter. Think of how we construct and form sentences in English by combining different elements, like nouns, verbs, articles, subjects, objects, etc.

Crafting Brilliant Sentences by Collins - Issuu

1. A good paragraph should have both unity and coherence. 2. Unity is achieved by; - discussing only one idea in a paragraph - always staying on the topic in your supporting sentence 3. Coherence is achieved by: - Repeating key nouns - Using consistent pronouns - Using transition signals to link idea - Arranging the ideas in logical order. 4.

CHAPTER 2-Unity Coherence | Noun | Paragraph

Never use tabs or mix tabs and spaces. The only exception is if a function definition runs over multiple lines. In that case, indent the second line to where the definition starts:

Chapter 2 R Style Guide | Basic R Guide for NSC Statistics

2.2 Create app directory and file. There are several ways to create a Shiny app. The simplest is to create a new directory for your app, and put a single file called `app.R` in it. This `app.R` file will be used to tell Shiny both how your app should look, and how it should behave.. Try it out by creating a new directory, and adding an `app.R` file that looks like this:
