Character Disturbance—The
Phenomenon of Our Age, the
new book by George K. Simon,
Ph.D., does two things
really well: It paints a no-
nonsense picture of how
people with personality
disorders, including
sociopaths, behave. And it
explains why traditional
psychotherapy, in attempting
to understand these
individuals, gets it so
wrong.

We define character disturbance as the relative absence of neurosis. And neurosis, simply stated, is the ability to experience inner anguish and anxiety as a result of guilt and shame (i.e. conscience). So, the less neurotic someone is and the more character disturbed they are, the more problems they're likely to bring to a relationship.

So, today we are facing a

near epidemic of what some theorists refer to as character disturbance.

Neurosis is still with us, but for the most part at functional as opposed to pathological levels. That is, most today experience just enough apprehension and internal turmoil when it comes to simply acting on their primal urges that they don't in fact "just do it."
