(2) Install proper Zoeller unichек (combination union and check valve), preferably just above the basin to allow easy removal of the pump for cleaning or repair. On sewage, effluent or dewatering, if high head or below cover installation is required use 30-0152 on 1-1/2" and 2" pipe and 30-0160 on 3" pipe. See (6) below.

~~INSTALLATION INSTRUCTIONS DATE INSTALLED: MODEL NUMBER~~

The valve provides a vertical-lift check valve function: until the circulator pump begins to run, the valve will prevent hot water from circulating through the piping system. The B&G installation sketch (left, edited) shows a simplified but typical location of a flo-control valve - the red device at the right-most side of the sketch.

exhibits a near zero leak rate with exceptional performance characteristics.

~~Mueller Refrigeration~~

These check valves provide uni-directional flow control of fluids and gases. To help prevent improper installation, all check valves have a flow arrow label with the valve's crack pressure rating permanently attached. The availability of a wide range of seat materials provide the system designer a variety of uses over a standard, general purpose check valve.
