Fully updated and greatly enhanced, the Third Edition of Urban Forestry addresses current issues in planning, establishing, and managing trees, forests, and other elements of nature in urban and community ecosystems. The authors discuss why we have trees in cities and how we use them, clarify the appraisal and inventory of urban vegetation, and extensively delve into the planning and management of public as well as private vegetation. As urban forestry continues to evolve as a profession, foresters and arborists can expect many challenges as well as opportunities. The continuing development of cities has become linked to a much greater emphasis on urban vegetation, the growing demand for recreation amenities within the urban environment, and the careful and successful management of vegetation in an urban ecosystem. New ways to incorporate the highly versatile urban forest resource into the urban fabric will undoubtedly benefit the lives of its residents.

Community & Public Health Nursing is designed to provide students a basic grounding in public health

nursing principles while emphasizing aggregate-level nursing. While weaving in meaningful examples from practice throughout the text, the authors coach students on how to navigate between conceptualizing about a population-focus while also continuing to advocate and care for individuals, families, and aggregates. This student-friendly, highly illustrated text engages students, and by doing so, eases students into readily applying public health principles along with evidence-based practice, nursing science, and skills that promote health, prevent disease, as well as protect at-risk populations! What the 8th edition of this text does best is assist students in broadening the base of their knowledge and skills that they can employ in both the community and acute care settings, while the newly enhanced ancillary resources offers interactive tools that allow students of all learning styles to master public health nursing.

"This user-friendly text is presented as a handbook for students and practicing nurses who work with communities to promote health. Community as Partner focuses on the essentials of practice with the community. Students will find this text helpful for the many examples of working with the community as partner. For over 20 years and five editions, this textbook has served undergraduate, RN to BS, and RN to MS students and graduate students alike as a framework for professional nursing practice in the community. Our intention is to keep the text basic and accessible to all who practice in the community.

Using this text with distance education and virtual learning with Internet resources will enrich practice in any community. This sixth edition continues the philosophy of the authors by strengthening the theoretical base with new chapters on globalization and rural health. All other chapters have been revised and updated from the fifth edition. We continue with a series of chapters that takes the reader through the entire nursing process by using a real-life community as our example. The urban example is enhanced and expanded throughout the remainder of the book by selected aggregates which serve as exemplars of working with the community as partner as well. "

This is the Canadian adaptation of the Fifth Edition of the AJN award-winning Community as Partner text. Focusing on public health promotion practices in Canada, this text examines the contemporary public health nurse's role as a hands-on caregiver, community detective, and epidemiologist. Part One provides a Canadian perspective on community nursing practice and legal, ethical, and sociocultural considerations. Part Two presents the Community as Partner Model, and Part Three contains case studies with Canadian examples. This edition places more emphasis on supportive environments for health, the five strategies of the Ottawa Charter, primary health care, and rural communities.
