Animal Companion Factsheets | PETA

Cats are felids, which are mammals that include lions, tigers, cougars, jungle cats, wildcats, mountain cats, sand cat and other wild cats. They all share a common ancestor that lived around 6 – 7 million years ago in Asia. Domestic cats are not radically different from wildcats, so they can interbreed.

### Animal Foundation Australia

Ferrets are domesticated animals whose ancestors are believed to be native European polecats (*Mustela putorius*). Inquisitive, smart, and playful, they 've become popular companion animals, but they require special food and care. 1 Often, after the novelty of an impulse purchase wears off, ferrets are abandoned to certain death outside or sent to severely crowded animal shelters.
