Cultural Anthropology, South African Edition provides an excellent coverage of cultures around the world. It is designed to increase your understanding of the human past and present, the unity and diversity that characterise the human species and how globalisation has affected the lives of people all around the world.

Now with SAGE Publishing! Culture Counts is a concise introduction to anthropology that illustrates why culture matters in our understanding of humanity and the world around us. Serena Nanda and Richard L. Warms draw students in with engaging ethnographic stories and a conversational writing style that encourages them to interact cross-culturally, solve problems, and effect positive change. The brief format gives majors and non-majors the essentials they need and frees up the instructor to teach the course the way they want to teach it. The Fifth Edition includes new examples and vignettes that are important to the study of cultural anthropology. Issues of gender, identity, globalization, intersectionality, inequality, and public health have been incorporated throughout the book, as well as a new chapter on race and ethnicity that brings the book in step with recent conversations about power, race, and history. A nursing diagnosis is defined as a clinical judgement about individual, family or community responses to actual or potential health problems or life processes which provide the basis for selection of nursing interventions to achieve outcomes for which the nurse is accountable. Accurate and valid nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and determine nurse-sensitive outcomes. Nursing diagnoses are seen as key to the future of evidence-based, professionally-led nursing care – and to more effectively meeting the need of patients and ensuring patient safety. In an era of increasing electronic patient health records standardized nursing terminologies such as NANDA, NIC and NOC provide a means of collecting nursing data that are systematically analyzed within and across healthcare organizations and provide essential data for cost/benefit analysis and clinical audit. 'Nursing Diagnoses: Definitions and Classification' is the definitive guide to nursing diagnoses worldwide. Each nursing diagnoses undergoes a rigorous assessment process by NANDA-I with stringent criteria to indicate the strength of the underlying level of evidence. Each diagnosis comprises a label or name for the diagnosis and a definition. Actual diagnoses include defining characteristics and related factors. Risk diagnoses include risk factors. Many diagnoses are further qualified by terms such as effective, ineffective, impaired, imbalanced, readiness for, disturbed, decreased etc. The 2009-2011 edition is arranged by concept according to Taxonomy II domains (i.e. Health promotion, Nutrition, Elimination and Exchange, Activity/Rest, Perception/Cognition, Self-Perception, Role Relationships, Sexuality, Coping/ Stress Tolerance, Life Principles, Safety/Protection, Comfort, Growth/Development). The book contains new chapters on 'Critical judgement and assessment' and 'How to identify appropriate diagnoses' and core references for all nursing diagnoses. A companion website hosts NANDA-I position statements, new PowerPoint slides, and FAQs for students. 2009-2011 edition arranged by concepts New chapters on 'Critical judgement and assessment' and 'How to identify appropriate diagnoses' Core references for new diagnoses and level of evidence for each diagnosis Companion website available

This ethnography is a cultural study of the Hijras of India, a religious community of men who dress and act like women. It focuses on how Hijras can be used in the study of gender categories and human sexual variation.

A comprehensive and accessible survey of the history of theory in anthropology, this anthology of classic and contemporary readings contains in-depth commentary in introductions and notes to help guide students through excerpts of seminal anthropological works. The commentary provides the background information needed to understand each article, its central concepts, and its relationship to the social and historical context in which it was written.

Anthropological Theory: An Introductory History, Seventh Edition, presents a selection of classic and contemporary essays in anthropology with annotations from authors R. Jon McGee and Richard L. Warms.

Explains how and why human cultures vary so greatly across space and time Cultural Anthropology, 14/e helps students understand how humans vary culturally and why they got to be that way. It provides both a comprehensive and scientific introduction to cultural anthropology. This new edition has an expanded and updated focus on environmental issues.

The result is increased student engagement and improved learning. Teaching and Learning Experience This program will provide a better teaching and learning experience- for you and your students. It: Immersive Learning Experiences with REVEL: REVEL delivers immersive learning experiences designed for the way today's students read, think, and learn. Engaging Pedagogically-Driven Design: Learning Objectives in each chapter correspond to chapter summary materials A Clear Understanding of humans: Readers will learn the major variations in human kinship, economic, political, and religious systems and why it is significant. Focus on Contemporary issues: Students will understand contemporary social problems and how anthropology might be used to address them.

A. Javier Treviño, working with a panel of experts, thoroughly examines all aspects of social problems, providing a contemporary and authoritative introduction to the field. Each chapter is written by a specialist on that particular topic and the unique, contributed format ensures that the research and examples provided are the most current and relevant available. The text is framed around three major themes: intersectionality (the interplay of race, ethnicity, class, and gender), the global scope of many problems, and how researchers take an evidence-based approach to studying problems.

Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences. Over the past 150 years, the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it. Consequently, both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar, if they have heard of them at all. Students, in particular, are likely to turn to the web to find quick background information on theorists and theories. However, most web-based information is inaccurate and/or lacks depth. Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics—the "who, what, where, how, and why," if you will. In response, SAGE Reference plans to publish the two-volume *Theory in Social and Cultural Anthropology: An Encyclopedia*. Features & Benefits: Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory, both in terms of breadth and depth of coverage. To ease navigation between and among related entries, a Reader's Guide groups entries thematically and each entry is followed by Cross-References. In the electronic version, the Reader's Guide combines with the Cross-References and a detailed Index to provide robust search-and-browse capabilities. An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present. Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion.
