### **|| CHAPTER 10- EVOLUTION** Darwin Theory Of Evolution Wordwise

Darwin's Theory of Evolution: Definition  
Darwin defined evolution as a process of "descent with modification." He believed that some organisms within a species have trait variants that make them fitter and more likely to reproduce. Over time, inherited modified traits become dominant in the population, and a new species may emerge.

Theory of Evolution: Definition, Charles Darwin, Evidence ...

Darwin's theory of evolution is the mechanism by which the natural world produces the variety of life. The theory of evolution is one of the most widely accepted ways to explain all life on earth....

Darwin's Theory of Evolution in 5 Easy Points | by The ...

Darwinism is a theory of biological evolution developed by the English naturalist Charles Darwin and others, stating that all species of organisms arise and develop through the natural selection of small, inherited variations that increase the individual's ability to compete, survive, and reproduce. Also called Darwinian theory, it originally included the broad concepts of transmutation of species or of evolution which gained general scientific acceptance after Darwin published *On the Origin of*
