In order to build a TV tuner radio scanner you need, of course, a tuner. Also you must be able to build some detectors (demodulators) for the common analog modulation schemes. Some frequency mixers need to be built too. Although designed for analog modulation, the scanner is able to demodulate digital signals using the PC sound card as input.

Design of a TV Tuner based radio scanner • One Transistor

DESIGN OF A TV TUNER BASED RADIO SCANNER Building radio frequency devices becomes difficult starting from VHF band. Moreover, tuning various stages is difficult without expensive electronics equipment. But a ready made unit can be used as the frontend of any radio receiver operating in the VHF - UHF band.

DESIGN OF A TV TUNER BASED RADIO SCANNER

A tv tuner can refer to a digital tuner or an ATSC (Advanced Television Systems Committee) tuner, often known as HDTV tuner or an ATSC receiver. Either way, it is a system that grabs free television streams
