Here, the careers of Giovanni Battista Belzoni, Bernardino Drouetti, and Henry Salt are discussed. Egyptomania in the 19 th and early 20 th century is the subject of chapter Seven. Here we encounter the fascination with the mystery of the preservation of the body and mummy-mania, including the notorious unwrapping parties.

Egyptomania: A History of Fascination, Obsession and ...

"The particular craze that's the focus of veteran historian Fritze's new book Egyptomania is one of the oldest intellectual fads in the history of mankind: the fixation with ancient Egypt that's been felt by the rest of the world for so long that it actually started when ancient Egypt wasn't even ancient. . . . Fritze's narrative is dense with historical detail and frequently sparkles with wit.

Ancient Egypt has been a focus of awe and fascination from the age of the Pyramids to the present day. In Egyptomania Ronald H. Fritze takes us on a historical journey to unearth the Egypt of the imagination, a land of weird gods, murky magic, secret knowledge, marvellous pyramids, enigmatic sphinxes, monumental obelisks, immense wealth and mystifying mummies.Egypt has always exerted a ...

The land of pyramids and sphinxes, pharaohs and goddesses, Egypt has been a source of awe and fascination from the time of the ancient Greeks to the twenty-first century. In Egyptomania, Ronald H. Fritze takes us on a historical journey to unearth the Egypt of the past, a place inhabited by strange gods, powerful magic, spell-binding hieroglyphs, and the uncanny, mummified remains of ancient people. Walking among monumental obelisks and through the dark corridors of long-sealed tombs, he reveals a long-standing fascination with an Egypt of incredible wonder and mystery. As Fritze shows, Egypt has exerted a powerful force on our imagination. Medieval Christians considered it a holy land with many connections to biblical lore, while medieval Muslims were intrigued by its towering monuments, esoteric sciences, and hidden treasures. People of the Renaissance sought Hermes Trismegistus as the ancient originator of astrology, alchemy, and magic, and those of the Baroque pondered the ciphers of the hieroglyphs. Even the ever-practical Napoleon was enchanted by it, setting out in a costly campaign to walk in the footsteps of Alexander the Great through its valleys, by then considered the cradle of Western civilization. And of course the modern era is one still susceptible to the lure of undiscovered tombs and the curses of pharaohs cast on covetous archeologists. Raising ancient Egyptian art and architecture into the light of succeeding history, Fritze offers a portrait of an ancient place and culture that has remained alive through millennia, influencing everything from religion to philosophy to literature to science to popular culture.

Ancient Egypt has been a focus of awe and fascination from the age of the Pyramids to the present day. In 'Egyptomania' Ronald H. Fritze takes us on a historical journey to unearth the Egypt of the imagination, a land of weird gods, murky magic, secret knowledge, marvellous pyramids, enigmatic sphinxes, monumental obelisks, immense wealth and mystifying mummies.

Egypt Land is the first comprehensive analysis of the connections between constructions of race and representations of ancient Egypt in nineteenth-century America. Scott Trafton argues that the American mania for Egypt was directly related to anxieties over race and race-based slavery. He shows how the fascination with ancient Egypt among both black and white Americans was manifest in a range of often contradictory ways. Both groups likened the power of the United States to that of the ancient Egyptian empire, yet both also identified with ancient Egypt's victims. As the land which represented the origins of races and nations, the power and folly of empires, despots holding people in bondage, and the exodus of the saved from the land of slavery, ancient Egypt was a uniquely useful trope for representing America's own conflicts and anxious aspirations. Drawing on literary and cultural studies, art and architectural history, political history, religious history, and the histories of archaeology and ethnology, Trafton illuminates anxieties related to race in different manifestations of nineteenth-century American Egyptomania, including the development of American Egyptology, the rise of racialized science, the narrative and literary tradition of the imperialist adventure tale, the cultural politics of the architectural Egyptian Revival, and the dynamics of African American Ethiopianism. He demonstrates how debates over what the United States was and what it could become returned again and again to ancient Egypt. From visions of Cleopatra to the tales of Edgar Allan Poe, from the works of Pauline Hopkins to the construction of the Washington Monument, from the measuring of slaves' skulls to the singing of slave spirituals—claims about and representations of ancient Egypt served as linchpins for discussions about nineteenth-century American racial and national identity.

Presents the history of the West's obsession with ancient Egyptian art and culture, from the time of the Romans, to the campaigns of Napoleon Bonaparte, the discovery Tutankhamen's tomb, and the popular culture of today.

"The discovery of Tutankhamen's tomb in 1922, by a sensation-hungry world newly united by mass media, created a wave of fascination unlike anything before. This study traces the origins of 20th century cinema's obsession with Ancient Egypt through previous eras and relates its recurring themes and ideas to the historical reality of the land of the Pharaohs"--

Published to accompany exhibition held at the Musée du Louvre, Paris, 20/1 - 18/4 1994 and travelling. The works in this exhibition show the influence of Egypt on western artists working in the eighteenth century.

The material and intellectual presence of Egypt is at the heart of Western culture, religion and art from Antiquity to the present. This volume aims to provide a long term and interdisciplinary perspective on Egypt and its mnemohistory, taking theories on objects and their agency as its main point of departure. The central questions the book addresses are why, from the first millennium BC onwards, things and concepts Egyptian are to be found in such a great variety of places throughout European history and how we can account for their enduring impact over time. By taking a radically object-oriented perspective on this question, this book is also a major contribution to current debates on the agency of artefacts across archaeology, anthropology and art history.

Elements from Ancient Egypt have been present in Croatia ever since Antiquity. 'Egypt in Croatia' considers artefacts discovered in present-day Croatia, 16th-20th century travellers, Egyptian collections and early collectors (1820s-1950s), the development of Egyptology as a field of study as well as the various elements of 'Egyptomania'.

The Greek historian Hecataeus of Abdera declared during the 4th century BCE that the Egyptian civilization was unsurpassed in the arts and in good governance, surpassing even that of the Greeks. During the Renaissance, several ecclesiastical nobles, including the Borgia Pope Alexander VI claimed their descent from the Egyptian god Osiris. In the 1920s, the discovery of Tutankhamun's tomb in the Valley of the Kings prompted one of the first true media frenzies in history. For thousands of years, the Pharaonic culture has been a source of almost endless fascination and obsession. But to what extent is the popular view of ancient Egypt at all accurate? In Egyptomaniacs: How We Became Obsessed With Ancient Egypt, Egyptologist Dr Nicky Nielsen examines the popular view of Egypt as an exotic, esoteric, mystical culture obsessed with death and overflowing with mummies and pyramids. The book traces our obsession with ancient Egypt throughout history and methodically investigates, explains and strips away some of the most popular misconceptions about the Pharaohs and their civilization

Mummies, experts, and breaking science revealed in journalist Pringle's fascinating dive into a little-known arena of human studies. Perhaps the most eccentric of all scientific meetings, the World Congress on Mummy Studies brings together mummy experts from all over the globe and airs their latest findings. Who are these scientists, and what draws them to this morbid yet captivating field? The Mummy Congress, written by acclaimed science journalist Heather Pringle, examines not just the world of mummies, but also the people obsessed with them.
