Ethics and the Forensic Sciences: Professional Autonomy in ...
Ethics in Forensic Science. Renowned forensic scientist Paul L. Kirk once stated "Physical evidence cannot be wrong, it cannot perjure itself, it cannot be wholly absent. Only human failure to find it, study and understand it, can diminish its value.". Ethics here is dealing with values related to human conduct, with respect to the rightness and wrongness of certain actions, and to the goodness and badness of the motives and ends of such actions.

Ethical issues across different fields of forensic science ...
One reason why ethics is so important in the field of forensic science is because the results yielded by physical evidence discovered at a crime scene have a great impact on the lives of others (Barnett, 2001). When evidence is mishandled, manipulated, or misinterpreted the outcome of the case is altered (Ayles, 1994).

Ethics and Training in Forensic Science
Most practitioners in forensic science and forensic medicine are committed, hard-working, ethical professionals; however, education and guidance on professional responsibility is uneven and there is no enforceable universal code of professional responsibility. In addition, when an adverse event
