Three missions to Mars this summer – from NASA, China and the United Arab Emirates – will join dozens of active and inactive...

## [Exploring the Solar System - The New York Times](#)

The exploration of our solar system is one of humanity's greatest scientific achievements. The last fifty years in particular have seen huge steps forward in our understanding of the planets, the sun, and other objects in the solar system. Whilst planetary science is now a mature discipline - involving geoscientists, astronomers, physicists, and others many profound mysteries remain, and there is indeed still the tantalizing possibility that we may find evidence of life on another planet in ...

Explore the solar system! The Solar System Explorer game contains several mini-games. You can explore the planets, moons, asteroids, and comets by clicking on them. Then, for some of the objects with NASA missions, you can play a game.

### [Explore the solar system! | NASA Space Place - NASA ...](#)

Discovery and exploration of the Solar System is observation, visitation, and increase in knowledge and understanding of Earth's "cosmic neighborhood". This includes the Sun, Earth and the Moon, the major planets Mercury, Venus, Mars, Jupiter, Saturn, Uranus, and Neptune, their satellites, as well as smaller bodies including comets, asteroids, and dust. The Solar System – our Sun's system of planets, moons, and smaller debris – is humankind's cosmic backyard. Small by factors of ...
