seeded berries which vary in size among cultivars and are usually pearshaped, but can be round or oval in shape, while all citrus fruits are berry-like fruits classified as hesperidia, which have a separable rind.

Tropical and Subtropical Fruits - an overview ...

Mediterranean and Sub-Tropical Fruits. Subtropical fruits need warm or mild temperatures throughout the year, but they can survive in a light frost.

The most common subtropical fruits are citrus fruits: oranges, grapefruits, lemons, and limes. Oranges, the leading citrus fruit, are grown from southern Japan.

In addition to citrus and the banana, four other tropical and subtropical fruits, pineapple, mango, avocado, and papaya, dominate the fresh fruit export trade (see Box 4). Pineapple clearly leads the ranking in processed fruits with a wide range of products, although juice and rings in syrup are the best known.

Tropical and Subtropical Fruit |  
Encyclopedia.com

The fruit crops grown under a climatic condition between temperate and the tropical are known as subtropical fruit crops. They may be either deciduous or evergreen and are usually able to withstand a low temperature but not the frost. They are also quite adoptive to fluctuations of light and dark period during day and night.
