G 120TP - GROB AIRCRAFT SE

Our version, the 109b, has a 17.4 meter wingspan, and is perfect for flight training exercises like stalling, because using the engine, you can stay in the air for longer than a normal glider and develop your skills more quickly.

Glider Flight Manual GROB G1028

"Rough air" includes the turbulence likely to be encountered in wave rotors, clouds, whirlwinds, and while flying over mountain ridges. The manoeuvring speed is the maximum speed at which full control deflections are permissible. At VNE only one third of the available movements may be used.
