Today, we're going to talk about the gross anatomy of the nervous system, specifically the central nervous system. The gross anatomy are the things that you can just see with your naked eye. So, the central nervous system consists of the brain and the spinal cord. There are some subdivisions within the brain itself.

Gross Anatomy of the Central Nervous System - Coursera

The forebrain, the midbrain, and the hindbrain are the three main parts of the brain. The forebrain has two major parts called the diencephalon and the telencephalon. The forebrain is responsible for a number of functions related to thinking, perceiving, and evaluating sensory information. The midbrain, also called the mesencephalon, connects the hindbrain and the forebrain.
