*Feeding your baby - Netmums*

Make snuggling up and feeding your baby a special time for you both. It is a time when you and your baby can bond with each other. While you're feeding your baby, maintain eye contact. Take time to cradle and caress your baby, look into your baby's eyes and your baby will look back at you.

*A Guide to bottle feeding leaflet - UNICEF UK*

Most newborns need eight to 12 feedings a day – about one feeding every two to three hours. Look for early signs of readiness to feed, such as moving the hands to the mouth, sucking on fists and fingers, and lip smacking. Fussing and crying are later cues. The sooner you begin each feeding, the less likely you'll need to soothe a frantic baby.

*Feeding your newborn: Tips for new parents - Mayo Clinic*

Between 17 and 26 weeks(4 to 6 months) of age your baby may begin to show some of the signs below: • not fully satisfi ed with their milk feed, • begin to demand milk feeds more frequently (this lasts for longer than one week), • show more interest in food, may begin reaching out for foods, • watches with interest when others are eating food, • chews and dribbles more often, and • is able to sit up with some support.
