That makes it a good time to take a look at the Health at Every Size (HAES) movement. Its goal is to define health in a more inclusive way — by eliminating weight stigma, respecting size diversity...

What is the Health at Any Size movement? - Washington Post

Health at Every Size (HAES) is a hypothesis advanced by certain sectors of the fat acceptance movement. It is promoted by the Association for Size Diversity and Health, a tax-exempt nonprofit organization that owns the phrase as a registered trademark. Proponents reject the scientific consensus regarding the negative health effects of greater body weight, and argue that traditional interventions focused on weight loss, such as dieting, do not reliably produce positive health outcomes.

Health at Every Size - Wikipedia

Health at Every Size: The Surprising Truth About Your Weight "Any person contemplating going on a diet to lose weight should read this book first. Every health professional who counsels people about weight control should absolutely read this book, read it again, and make sure their clients read it"

Health At Every Size Book | Linda Bacon, PhD

HEALTH AT EVERY SIZE The basic premise of health at every size, as written in Linda Bacon’s Book, Health at Every Size: The surprising truth about your weight, is that “Health at Every Size” (HAES) acknowledges that well-being and healthy habits are more important than any number on the scale.

Lindo Bacon, PhD, formerly Linda Bacon

Health At Every Size (HAES) is a weight-inclusive approach to health. HAES practitioners advocate that a focus on healthy behaviours, rather than a focus on reducing body size, is the most useful way to support people of all sizes to take care of their health. Read more.

HAES Australia Inc - Home

A Health at Every Size (HAES) approach has been proposed to address weight bias and stigma in individuals living with obesity, and more recently articulated as a promising public health approach beyond the prevailing focus on weight status as a health outcome.

The Health at Every Size paradigm and obesity: missing ...

Support for Health at Every Size A large body of evidence suggests a correlational link between obesity and numerous chronic health conditions such as diabetes, hypertension and arthritis (Kearns et al., 2014). Despite this correlational link, there is little direct evidence showing that obesity causes these conditions (Bombak, 2014).

Health at Every Size - American Council on Exercise

HAES is an approach to health that provides an alternative to the conventional weight-centered model through de-emphasizing weight as an indicator of health and promoting size acceptance. HAES works to end weight-based discrimination and focuses on balanced eating, enjoyable physical activity, and respect for bodies of all shapes and sizes.
