Chapter 1 Basics of Heat Transfer 1-2 Heat and Other Forms of Energy 1-8C The rate of heat transfer per unit surface area is called heat flux q . It is related to the rate of heat transfer by $q = \dot{Q}/A$ & $\dot{Q} = qA$. 1-9C Energy can be transferred by heat, work, and mass. An energy transfer is heat transfer when its driving force is temperature difference.

Heat and mass transfer is a jumble of many different topics and applications, but Mills manages to give the subject some cohesion and derives most important results from the basic conservation equations. Heat and mass transfer are inherently convoluted because they so frequently fuse theoretical and experimental ideas.
