Anthropological study of journalists and their work in a north Indian city ...

In the 1990s, a newspaper revolution began blowing across northern and central India. When literacy levels rose, communications expanded, and purchasing power climbed in these Hindi-speaking states, newspapers followed—picking up readers in small towns and villages. Even while these newspapers surged to the top of national readership charts, they localised furiously in the race for readers. But in this universe of local news, questions arose about what localisation was doing to regional identity and consciousness. Using notes from her pioneering field-study in eight states, Sevanti Ninan brilliantly brings alive India's ongoing Hindi newspaper revolution, and its impact on politics, administration and society. Set against the socio-economic and political changes in the countryside, it is a remarkable story of how journalism flowered in unexpected and unorthodox ways, and colourful media marketing unfurled in the Hindi heartland.

1.1 Preamble Schools are the production centres endowed with the noble responsibility of producing learned, civilized and worthy citizens of a country Every school has its own plan of action with a set of well-designed curriculum objectives. The aim of the school is not just academic achievement of the students, rather the development of overall personality of them. And so, emphasis is being given on scholastic, co-scholastic and non-scholastic skills of the students. Libraries in the schools are the strong supporting centres which supplement and complement the accomplishment of the objectives set

forth by their parental bodies. They are the knowledge facilitation points in every school. According to the U.S. Commission on Libraries and Information Science (2005), "Students in schools with good school libraries learn more, get better grades, and score higher on standardized test scores"(p.4). As Ranganathan(1962) quoted ' The result of modern re-thinking on education is to make the library the heart of the school, from which every activity in the school radiates and by which it all gets irradiated'. International Association of School Librarianship (IASL) Policy statement on school libraries remarks that the school library is essential to "the development of the human personality as well as the spiritual, moral, social, cultural and economic progress of the community"(p.1).

This book written as per the syllabus of Bihar Polytechnic, provides the students not just the knowledge about the fundamentals of a computer system, like its organization, memory management and hardware devices, but also the software that run on it. The book then proceeds to describe operating systems, and the basics of programming concepts like procedure-oriented programming and object-oriented programming. Useful application software like MS Word, MS Excel and MS PowerPoint are described in great detail in separate chapters. A complete section has been devoted to the teaching of data communication, networking and Internet. The book ends with a detailed description of the business applications of computers.

With the invention of computers and the advent of the Internet, mobile computing and e-Business applications, Information Technology (IT) has brought rapid progress in domestic and international business, and a tremendous change in the lifestyle of people. This book provides the students not just the knowledge about the fundamentals of a computer system, like its organization, memory management and hardware devices, but also the software that run on it. The book then proceeds to describe operating systems, and the basics of programming concepts like procedure-oriented programming and object-oriented programming. Useful application software like MS Word, MS Excel and MS PowerPoint are described in great detail in separate chapters. A complete section has been devoted to the teaching of data communication, networking and Internet. The book ends with a detailed description of the business applications of computers. KEY FEATURES • Incorporates basics of IT along with developing skills for using various IT tools • Includes diagrams, pictures and screenshots • Provides key terms, review questions, practical exercises, group discussions, project activities and application-based case studies in each chapter • Follows the latest curriculum and guidelines for undergraduate and postgraduate courses of various universities, colleges and institutes

As communication and networking (CN) become specialized and fragmented, it is easy to lose sight that many topics in CN have common threads and because of this, advances in one sub-discipline may transmit to another. The presentation of results between different sub-disciplines of CN encourages this interchange for the advancement of CN as a whole. Of particular interest is the hybrid approach of combining ideas from one discipline with those of another to achieve a result that is more significant than the sum of the individual parts. Through this hybrid philosophy, a new or common principle can be discovered which has the propensity to propagate throughout this multifaceted discipline. This volume comprises the selection of extended versions of papers that were presented in their shortened form at the 2008 International Conference on Future Generation Communication and Networking (<http://www.sersc.org/FGCN2008/>), International Conference on Bio-Science and Bio-Technology (<http://www.sersc.org/BSBT2008/>), International Symposium on u- and e- Service, Science and Technology (<http://www.sersc.org/UNESST2008/>), International Symposium on Database Theory and Application (<http://www.sersc.org/DTA2008/>), International Symposium on Control and Automation (<http://www.sersc.org/CA2008/>), International Symposium on Signal Processing, Image Processing and Pattern Recognition (<http://www.sersc.org/SIP2008/>), International Symposium on Grid and Distributed Computing (<http://www.sersc.org/GDC2008/>), International Symposium on Smart Home (<http://www.sersc.org/SH2008/>), and 2009 Advanced Science and Technology (<http://www.sersc.org/AST2009/>).
