The Financial Crisis Inquiry Report, published by the U.S. Government and the Financial Crisis Inquiry Commission in early 2011, is the official government report on the United States financial collapse and the review of major financial institutions that bankrupted and failed, or would have without help from the government. The commission and the report were implemented after Congress passed an act in 2009 to review and prevent fraudulent activity. The report details, among other things, the periods before, during, and after the crisis, what led up to it, and analyses of subprime mortgage lending, credit expansion and banking policies, the collapse of companies like Fannie Mae and Freddie Mac, and the federal bailouts of Lehman and AIG. It also discusses the aftermath of the fallout and our current state. This report should be of interest to anyone concerned about the financial situation in the U.S. and around the world.THE FINANCIAL CRISIS INQUIRY COMMISSION is an independent, bi-partisan, government-appointed panel of 10 people that was created to "examine the causes, domestic and global, of the current financial and economic crisis in the United States." It was established as part of the Fraud Enforcement and Recovery Act of 2009. The commission consisted of private citizens with expertise in economics and finance, banking, housing, market regulation, and consumer protection. They examined and reported on "the collapse of major financial institutions that failed or would have failed if not for exceptional assistance from the government."News Dissector DANNY SCHECHTER is a journalist, blogger and filmmaker. He has been reporting on economic crises since the 1980's when he was with ABC News. His film In Debt We Trust warned of the economic meltdown in 2006. He has since written three books on the subject including Plunder: Investigating Our Economic Calamity (Cosimo Books, 2008), and The Crime Of Our Time: Why Wall Street Is Not Too Big to Jail (Disinfo Books, 2011), a companion to his latest film Plunder The Crime Of Our Time. He can be reached online at www.newsdissector.com.

To get the biggest return, real estate investors need the right financing. And as they buy multiple properties, their debt to equity rises, making it more difficult to get the kind of deal they need. As many investors have learned the hard way, getting the wrong financing can wipe out their profits, hold them back from selling because of a lack of equity, or force them to try to sell for more than the market will bear. The Real Estate Investor's Guide to Financing is the one book that shows readers how to get the right financial package for the biggest return on their investment. As a respected author and mortgage banker, David Reed has spent more than 20 years helping investors finance their properties. Here, he offers advice on such crucial topics as: \* financing options for different property types \* the financial implications of renting vs. flipping \* setting rental rates \* the challenges and benefits of being a landlord, including rent loss coverage \* the pros and cons of having partners \* tips on financing a second home, duplex, multi-family unit, or condo Complete with essential advice on financing and a glossary of investment terms, this is the one guide that will help readers start making real money.
