How to Read a Book is a 1940 book by the philosopher Mortimer J. Adler. He co-authored a heavily revised edition in 1972 with the editor Charles Van Doren, which gives guidelines for critically reading good and great books of any tradition.

*How to Read a Book - Wikipedia*

Syntopical Reading involves reading many books on the same subject and comparing and contrasting ideas, vocabulary, and arguments. This task is undertaken by identifying relevant passages, translating the terminology, framing and ordering the questions that need answering, defining the issues, and having a conversation with the responses.

Read your book. Find a comfortable place to sit, make sure there's plenty of light, and open the front cover. Start at the beginning, which is usually the first chapter unless there's some front material, and read each page in order until the book is finished.

*3 Ways to Read a Book - wikiHow Life*

Third, read the book all the way through, somewhat quickly. Adler actually calls this a "superficial reading"; you're simply trying to digest the overall purpose of the book. Now, this doesn't necessarily mean speed-reading. It more means that you won't stop and scrutinize the meaning of each and every paragraph.

If we take that an average person reads 200-250 words in a minute and that every page has around 300 words on average, that would mean that a 400-page book has around 120,000 words in it. Now, when we divide the number of words by a number of words that an average person reads per minute (let's take 200), we get 600 minutes.
