1. Hook up your timing light or timing gun. Hook your timing gun up to the power and ground terminals on your car's battery, and hook the sensor that accompanies the timing gun to your number one cylinder spark plug wire. Follow the instructions particular to the timing light you're using to hook it up properly.

How to Adjust Timing: 12 Steps (with Pictures) - wikiHow

First, loosen the three small bolts around the distributor cap in case you end up having to retard or advance the timing. Under the hood there should be a label that gives you the timing requirements. Follow these closely. Using the timing light, you want to line up the degree marks (16 or 12) with the indicator on the timing cover.

How To Set The Timing Marks On A 2000 528i

Just set the idle as if you were in drive and then adjust the timing to the factory-specified timing mark. The reality is a little more complex. The manual says to do the above, plus disconnect the timing connector, which comes out of the harness conduit next to the distributor. This will put the system in the bypass mode.
