Since the therapeutic value of umbilical cord blood (UCB) stem cells was first recognised in

Read Book Hsc Board 2015

the late 1980s, there has been a proliferation of both public and private UCB banks worldwide. However, the ability to utilise such a potentially valuable resource has provoked a number of controversies. In a distinctly accessible style, this book unpacks the socio-legal implications of the UCB collection process and constructs a detailed analysis of the law and ethics that surrounds UCB banking in the UK, including ownership of the cells. Its enquiry is located within the theoretical framework of altruism versus self-interest and explores the notions of risk and choice associated with this distinctive blend of public/private healthcare provision. The book evaluates the impact of the Human Tissue Act 2004 and the European Union Tissues and Cells Directive (2004/23/EC) on the UCB industry and provides a unique insight into the effect that the law may have on the NHS whose maternity staff and premises are used to collect UCB. This book would be of interest primarily to a UK readership in addition to expectant families, health professionals, students, academics, practitioners and the UCB industry elsewhere in the world.

The United Kingdom ' s health systems have long made the quality of care a high priority, pioneering many tools and policies in this area. Yet despite being a global leader in monitoring and improvement, the United Kingdom does not consistently perform well on international quality benchmarks. Why?

- the actual 2015 HSC exam questions
- the guidelines provided to exam markers
- samples of top-scoring student responses
- specific markers' comments on student responses.

The Routledge International Handbook of Social Work Education provides an authoritative overview of current understanding through coverage of key debates, exploring the state of play in particular social work education fields and reflecting on where the future might be taking us. The overall aim of the Handbook is to further develop pedagogic research and scholarship for social work education. Drawing on medical education as an exemplar, the contributions view social work education as a specialism and a field of expertise that counts in the same way as research programmes in more traditional areas of social work practice. The chapters are concerned with the theory and practice of social work education at all levels; they are accessible, conceptually clear, research based where appropriate, critically reflective and ethically underpinned. The Handbook is organised into seven sections that reflect the proposed themes and sub-themes covering:

- Social work education in context: the western drivers
- Emerging and re-emerging social work education
- The scholarship of learning and teaching
- New insights into field education
- New directions in learning and teaching
- Future challenges in social work education

This handbook presents a contribution to the process of exchange and dialogue which is essential to global social work education. It brings together professional knowledge and lived experience, both universal and local, and will be an essential reference for social work educators, researchers, students and professionals.

Northern Ireland is currently undertaking public administration reforms. This report highlights areas where Northern Ireland possesses strengths upon which to build reforms and suggests actions for the future.

Literature teaching remains central to the teaching of English around the world. This edited text brings together expert global figures under the banner of the International Federation for the Teaching of English (IFTE). The book captures a state-of-the-art snapshot of leading trends in current literature teaching, as well as detailing predicted trends for the future. The expert scholar and leading teacher contributors, coming from a wide range of countries with fascinatingly diverse approaches to literature teaching, cover a range of central and fundamental topics: literature and diversity; digital literatures; pedagogy and reader response; mother tongues; the business of reading; publishers, adolescent fiction and censorship; assessing responses to literature; the changing definitions of literature and multimodal texts. The collection reviews the consistently important place of literature in the education of young people and provides international evidence of its enduring value and contribution to education, resisting the functionalist and narrowly nationalist perspectives of misguided government authorities. *International Perspectives on the Teaching of Literature in Schools* will be of value to researchers, PhD students, literature scholars, practitioners, teacher educators, teachers and all those in the extensive academic community interested in English
