Corporate governance principles provide guidance on how corporations should operate. Adoption of international corporate governance best practices leads to long-term sustainability and resilience, and can be a competitive tool to attract foreign investments. The Asian Development Bank, in partnership with the ASEAN Capital Markets Forum, have jointly developed the ASEAN Corporate Governance Scorecard, an assessment based on publicly available information and benchmarked against international best practices that encourage publicly listed companies to go beyond national legislative requirements. This report can be used by capital market regulators and other stakeholders as a reference to understand the current corporate governance standards across the region. It is also a useful diagnostic tool to guide improvement of corporate governance standards.

The Drug Wars in America, 1940-1973 argues that the U.S. government has clung to its militant drug war, despite its obvious failures, because effective control of illicit traffic and consumption were never the critical factors motivating its adoption in the first place. Instead, Kathleen J. Frydl shows that the shift from regulating illicit drugs through taxes and tariffs to criminalizing the drug trade developed from, and was marked by, other dilemmas of governance in an age of vastly expanding state power. Most believe the "drug war" was inaugurated by President Richard Nixon's declaration of a war on drugs in 1971, but in fact his announcement heralded changes that had taken place in the two decades prior. Frydl examines this critical interval of time between regulation and prohibition, demonstrating that the war on drugs advanced certain state agendas, such as policing inner cities or exercising power abroad. Although this refashioned approach mechanically solved some vexing problems of state power, it endowed the country with a cumbersome and costly "war" that drains resources and degrades important aspects of the American legal and political tradition.

Lesson Study has been actively introduced from Japan to various parts of the world, starting with the US. Such introduction is heavily connected with a focus on mathematics education and there is a strong misconception that Lesson Study is only for mathematics or science. The introduction is usually done at the departmental or form level and there has been a strong question about its sustainability in schools. This book comprehensively explores the idea of Lesson Study for Learning Community (LSLC) and suggests that reform for the culture of the school is needed in order to change learning levels among the children, teachers and even parents. In order for this to happen, the ways of management and leadership are also included as objectives of LSLC, as are practices at the classroom level. It argues that LSLC is a comprehensive vision and framework of school reform and needs to be taken up in a holistic way

across disciplines. Chapters include: How to Create Time How to Build the Team How to Promote Reform How to Reform Daily Lessons How to Conduct a Research Lesson How to Discuss Observed Lessons How to Sustain School Reform based on LSLC Strong interest in LSLC is already prevalent in Asian countries, such as Japan, China, Korea, Taiwan, Indonesia, Vietnam and Singapore and is now being introduced more in the west. This book will be of great interest to those involved in education policy and reform, and for practitioners of education at all levels.

Increasingly critical and sophisticated stakeholders request companies to engage in Corporate Social Responsibility (CSR) activities and to communicate about such efforts. Driven by such an energetic demand, CSR communication seems like a straightforward task: to inform stakeholders better about corporate CSR activities. Yet, strategic CSR communication is anything but a straightforward endeavor. Communicating an organization as a socially responsible entity implies not only better information but also that organizational members develop a concurrent sensitivity towards the changing expectations among a variety of stakeholders who voice their concerns with different intensity and on different topics. This book raises the key issues, the challenges, and the complexity that face managers as they engage themselves and their organizations in a stakeholder dialogue about on communicating their CSR efforts.
