The 4jx1 engine as some forums
would suggest and imply, doesn't like
to pushed hard and strained to the
limit and I agree, unlike the 4jg2.
When running well, the 4jx1 is really
smooth, responsive with adequate
power.

5w30 is what Isuzu recommends anyway and I can tell eithan wouldn't put anything else but that in a 4jx1. We, 4JX1 owners should bear in mind that this engine was ahead of its time. I have a Merc E220 CDI from 2005 and the manual recommends 5w40. It's all to do with technology really to my very own opinion.

This is why if a 4JX1 has this problem you will find the oil level rising on the dipstick due to diesel entering the oil via the injectors. However, this is usually a slow process, and symptoms will include blue smoke from the exhaust as the engine burns oil. Also if the engine is faulty, you will find traces of oil in the fuel filter.
