Jones supports this view by pointing out that Nike shoes are more comfortable, last longer, and provide more cushioning for the feet.

How to Write a Summary of an Article - Owlcation - Education

Journal Paper Review Forms are used by those with the authority in educational institutions to hand out a proper review on a journal paper regarding a specific kind of subject or topic. These forms tend to touch on just how well the person who conducted the interview was able to research and interpret all his or her findings regarding the topic he or she explains in the journal.

Many scientists and engineers consider themselves poor writers or find the writing process difficult. The good news is that you do not have to be a talented writer to produce a good scientific paper, but you do have to be a careful writer. In particular, writing for a peer-reviewed scientific or engineering journal requires learning and executing a specific formula for presenting scientific work. This book is all about teaching the style and conventions of writing for a peer-reviewed scientific journal. From structure to style, titles to tables, abstracts to author lists, this book gives practical advice about the process of writing a paper and getting it published.

An interactive, multimedia text that introduces students to reading and writing at the college level.

Recent years have seen a growing interest in the pedagogical benefits of digital games, which have the potential to engage learners and to encourage interaction in the target language. The use of digital

games in language education is based on the premise that successful learning is integrated into the sociocultural context of learners' lives and encourages collaboration and lifelong learning, bridging learning within and outside the language classroom. However, the potential of digital games has not been properly investigated from a second language learning and teaching perspective. This volume presents the first dedicated collection of papers to bring together the state-of-the-art in research into game-based learning. It includes theoretical, empirical, and practice-oriented contributions and as such will appeal to anyone with an interest in the most recent developments in language education.

'A comprehensive, well-written and beautifully organized book on publishing articles in the humanities and social sciences that will help its readers write forward with a first-rate guide as good company.' - Joan Bolker, author of *Writing Your Dissertation in Fifteen Minutes a Day* 'Humorous, direct, authentic ... a seamless weave of experience, anecdote, and research.' - Kathleen McHugh, professor and director of the UCLA Center for the Study of Women Wendy Laura Belcher's *Writing Your Journal Article in Twelve Weeks: A Guide to Academic Publishing Success* is a revolutionary approach to enabling academic authors to overcome their anxieties and produce the publications that are essential to succeeding in their fields. Each week, readers learn a particular feature of strong articles and work on revising theirs accordingly. At the end of twelve weeks, they send their article to a journal. This invaluable resource is the only guide that focuses specifically on publishing humanities and social science journal articles.

Eating disorders (EDs) affect at least 11 million people in the United States each year and spread across age, race, ethnicity and socio-economic class. While professional literature on the subject has grown a great deal in the past 30 years, it tends to be exclusively research-based and lacking expert clinical commentary on treatment. This volume focuses on just such commentary, with chapters authored by both expert clinicians and researchers. Core issues such as assessment and diagnosis, the correlation between EDs and weight and nutrition, and medical/psychiatric management are discussed, as are the underrepresented issues of treatment differences based on gender and culture, the applications of neuroscience, EDNOS, comorbid psychiatric disorders and the impact of psychiatric medications. This volume uniquely bridges the gap between theoretical findings and actual practice, borrowing a bench-to-bedside approach from medical research. Includes real-world clinical findings that will improve the level of care readers can provide, consolidated in one place Underrepresented issues such as gender, culture, EDNOS and comorbidity are covered in full Represents outstanding scholarship, with each chapter written by an expert in the topic area

Did a "doctrine race" exist alongside the much-publicized arms competition between East and West? Using recent insights from organization theory, Kimberly Marten Zisk answers this question in the affirmative. Zisk challenges the standard portrayal of Soviet military officers as bureaucratic actors wedded to the status quo: she maintains that when they were confronted by a changing external security environment, they reacted by producing innovative doctrine. The author's extensive evidence is drawn from newly declassified Soviet military journals, and from her interviews with retired high-ranking Soviet General Staff officers and highly placed Soviet-Russian civilian defense experts. According to Zisk, the Cold War in Europe was powerfully influenced by the reactions of Soviet military officers and civilian defense experts to modifications in U.S. and NATO military doctrine. Zisk also asserts that, contrary to the expectations of many analysts, civilian intervention in military policy-making need not provoke pitched civil-military conflict. Under Gorbachev's leadership, for instance, great efforts were made to ensure that "defensive defense" policies reflected military officers' input and expertise. *Engaging the Enemy* makes an important contribution not only to the theory of military organizations and the history of Soviet military policy but also to current policy debates on East-West security issues. Kimberly Marten Zisk is Assistant Professor of Political Science and Faculty Associate of the Mershon Center at the Ohio State University.

This Second Edition of Diana Ridley 's bestselling guide to the literature review outlines practical strategies for reading and note taking, and guides the reader on how to conduct a systematic search of the available literature, and uses cases and examples throughout to demonstrate best practice in writing and presenting the review. New to this edition are examples drawn from a wide range of disciplines, a new chapter on conducting a systematic review, increased coverage of issues of evaluating quality and conducting reviews using online sources and online literature and enhanced guidance in dealing with copyright and permissions issues.

*Health Sciences Literature Review Made Easy* helps students and practitioners better understand scientific literature by instilling the essential skills (via the matrix method) needed to critically evaluate article findings. The fundamental principles of searching, organizing, reviewing, and synthesizing are covered at the most basic level. Visual examples and a single case study are woven throughout the text. This easy-to-read and practical reference is an invaluable aid to students, researchers, and practitioners. The Third Edition has been completely revised and updated to reflect the switch out of "paper" mode and into electronic mode. Clinical practice examples and references to PubMed and PubMed Central have been added throughout along with information on reference management softwares such as endnote and refworks.

Reflecting the enormous changes and advancements in the indexing and retrieval of online health information made possible by the Internet, this title book summarizes technical state-of-the-art research results in health/medical information retrieval. Coupled with the growth of the World Wide Web, the topic of information retrieval has had a tremendous impact on consumer health information and genomics.
