monographs on herbs and nutritional compounds based on more than 25 years of clinical practice with thousands of patients Weaving together the ancient wisdom of herbalism and the most up-to-date scientific research on cancer, aging, and nutrition, renowned medical herbalist and clinical nutritionist Donald Yance reveals how to master stress, improve energy levels, prevent degenerative disease, and age gracefully with the elite herbs known as adaptogens. Yance ' s holistic approach, called the Eclectic Triphasic Medical System (ETMS), is based on extensive scientific research, more than 25 years of clinical practice, and excellent results with thousands of patients. It centers on four interconnected groups of health tools: botanical formulations, nutritional supplements, diet, and lifestyle. Defining three categories for adaptogenic herbs, he explains how formulations should combine herbs from each category to create a synergistic effect. He provides more than 60 monographs on herbs and nutritional compounds as well as custom combinations to revitalize the immune system, build cardiovascular health, protect brain function, manage weight, and support cancer treatment. He explains the interplay of endocrine health, the hypothalamic-pituitary-adrenal (HPA) axis, thyroid function, and stress in the aging process and reveals how adaptogenic treatment begins at the cellular level with the mitochondria--the microscopic energy producers present in every living cell. Emphasizing spirituality, exercise, and diet in addition to herbal treatments and nutritional supplements, Yance ' s complete lifestyle program explores how to enhance energy production in the body and subdue the proinflammatory state that lays the groundwork for nearly every degenerative disease, taking you from merely surviving to thriving.

Discovery in the Desert is the first book in Tom Thiele's Discovery Series. When asked about religious affiliation, do you describe yourself as a Christian? Do you wonder about heaven? When someone knows that they are a good person, does that mean that they are a heaven-bound Christian? That is exactly how David Hart saw himself before his discovery in the desert. David Hart, a young, bright NASA physicist is chosen to join a team of other NASA scientists assigned to a Classified Military Project. The team is formed to bring a new, cutting edge technology to the United States military-Time Travel. Initially great strides are made in developing a time travel capsule, and then the team hits a brick wall. Once the obstacle becomes common knowledge at NASA, the project transforms from one of prestige and glamor to one of embarrassment. The slowed progress grates on David's patience. Then he decides to do the unthinkable! Join David on this adventure of a lifetime as he realizes that not only has he been chosen to be on this NASA team, but he has been chosen for a much more significant task. A task, that once accomplished, will change David's life forever.
