This edited book offers concrete information and useful suggestions to graduate students who are seeking employment at institutions of higher education in North America and other parts of the world. This book also targets entry-level faculty members who are exploring increased participation in professional activities. The book features critical turning points in career trajectories, demystifies hidden institutional structures, and illuminates blind spots that are critical for career success. The authors are scholars from nonnative-English-speaking and/or racially minority backgrounds in the fields of applied linguistics and teaching English to speakers of other languages. The firsthand suggestions offered by these authors are also applicable to non-minority professionals and those in other related disciplines. Furthermore, the book assists faculty mentors and administrators to understand the unique challenges and issues faced by minority professionals. Distinctive features of the book are: (1) theme-based approach with concrete examples and specific advice; (2) focus on victory narratives of success and strategies rather than victim narratives of struggles; (3) accessible style, and (4) wide range of experiences narrated by both novice and established scholars. This guidebook can be read independently or adopted as a resource book for graduate seminars.

It can be difficult to find reliable information that amplifies the voices and the viewpoints of those who have direct experience dealing with diversity, equity and inclusion. In Demystifying Diversity: Embracing our Shared Humanity, Biracial journalist Daralyse Lyons has interviewed more than 100 individuals—academics, politicians, thought-leaders, advocates, activists and even an incarcerated inmate—and reveals her most important information and insights. By engaging with this text, you will find areas of human intersection and connection that challenge your biases and break down your barriers. Through empathy and understanding, we can create a more inclusive world. "The work of any reconciliation along the lines of the basis of identity requires vulnerability, a vulnerability that we are told is not of value to the American way of being." -- Paul Reese, Master of Divinity, Yale Divinity School "Exposure and practice prepare people for unpredictable racial moments." -- Dr. Howard Stevenson, director, Racial Empowerment Collaborative "We are siblings in humanity. No one has superiority over another, except by their character." -- Nihad Awad, executive director and co-founder of the Council on American-Islamic Relations "In the present—and correcting the ills of the past—our public policy needs to always move towards equity. If we can do that, I think, as a society, we're going to get better." -- Senator Sharif Street, third senatorial district of Philadelphia Learn more about the Demystifying Diversity project and podcast at DemystifyingDiversityPodcast.com and connect with the author at DaralyseLyons.com From Loving Healing Press www.LHPress.com

Intended primarily for mental health professionals, Demystifying Love deals plainly with topics rarely written about for clinicians. The book discusses in a small package highly readable and useful topics, such as love (as both noun and verb), psychological intimacy, sexual desire, as well as infidelity, both in background concepts and clinical guidelines. As the book shows, love is the logical point of departure for a clinical understanding of sexuality and its problems. It is the most conventional framework for understanding sexual behaviors, the one that is broadly endorsed across many cultures, often as the ideal context for sexual expression. The book integrates an analysis of love in patients dealing with intimacy, sexual desire, infidelity, forgiveness and reconciliation. Detailed with compelling case studies, the author ' s skill as a therapist comes through in the discussion of these topics—many of which are at the heart of numerous couple problems. In creating this illuminating work for mental health professionals, Dr. Levine may have underestimated its appeal. Dr. Levine ' s ability to shed light on our internal processes as we love and attempt to be loved throughout life may prove to be of interest to a far broader audience.

If you are a doctoral or non-doctoral student about to begin your internship in school psychology, you may have several questions about the process and what it will involve, and you may even be facing some anxiety about it. If you are a site or university supervisor preparing for the beginning of the internship year, you may be looking for ways to improve the internship experience for your students or for yourself and your fellow supervisors. Newman has used his many years of experience working with interns and field supervisors to create this guide to the school psychology internship process to address these common concerns. He provides a comprehensive overview of the school psychology internship process from start to finish, describing actions that can be taken to promote a high quality, dynamic internship experience. Emphasis is placed on the idea that the internship year is a dynamic and formative experience, not a static event, and that interns and supervisors both must be active planners, coordinators, and shapers of the experience. Each part of the book explores a different phase of the internship, from the first days through job applications and interviews. Helpful and pragmatic tools are included throughout, such as evaluation tools, best practice guidelines, and sample forms. Online resources are also available to complement the book and include reproducible material from the book, videos students can use to practice their interviewing skills, and links to helpful resources.

Demystifying the Engineering Ph.D. explores what it means to be an engineering Ph.D. holder, including insights from engineering professionals working in academia and industry across multiple institute types and companies. Topics covered include motivations for obtaining a Ph.D., the added value of a Ph.D., and career options for Ph.D. holders. The book concludes with recommendations for transforming engineering doctoral education to preparing doctoral students for diverse careers in industry and academia. Helps readers gain insights into diverse engineering work environments and explores ways to transition across engineering sectors and careers Presents real-world experiences of engineering Ph.D.'s working in academia, industry, government and other non-traditional areas Discusses how to communicate your work to a variety of audiences

Demystifying the First Year of Law School: A Guide to the 1L Experience provides law students with explicit frameworks for reading and analyzing court opinions in all first year courses. Using hypothetical classroom dialogues, the book explains how these frameworks will help student understand and participate in classroom discussions, answer questions on exams, and use the skills learned in the first year when representing clients in practice. Unraveling the mysteries of the first year of law school, authors Moore and Binder provide clear definitions, along with concrete examples, of the two types of legal issues typically addressed in court opinions illustrations of the six types of arguments routinely used by courts, lawyers and professors to resolve legal issues. These illustrations should help students understand a court's rationale for its decision and help students make legal arguments on exams and in practice a straightforward explanation for the use of the question-and-answer format in first year classrooms, with numerous illustrative examples of hypothetical in-class dialogues a step-by-step approach for briefing court opinions in preparation for class, along with a companion website with illustrative examples of case briefs of court opinions in subjects addressed in first year courses Written by top scholars drawing on their experience as authors and educators, Demystifying the First Year of Law School: A Guide to the 1L Experience, gives the benefit of experience to the uninitiated. It's ideal as a companion to any first year course, as a text in a legal methods or academic support course, or as background for a law school orientation program. A Teacher's Manual is available at www.aspenlawschool.com/books/moorebinder.

Based on extensive participant observation research, a life-history model is presented to explain why very few of those who come into contact with narcotics become problematic consumers; that is make drugs one of the most central elements in their lives. The model covers four stages in the deviant career; two preceding and two subsequent to the individual's narcotics debut. Prohibition and harm reduction as models for intervention are presented, and the implications for drug policy of the life-history model are discussed.

Venture Capital is a marriage between 'people with money and no ideas' and 'people with ideas and no money'. It is a high-risk investment vehicle with the potential for manifold returns and the possibility of a complete investment written-off. Although it is essentially private money and smaller in size than traditional financing pillars, its impact has been phenomenal, even to the extent of transforming the way we live in the modern world. Yet the fact remains that the business of venture capital is not fully understood by startup founders and fund managers are also not familiar with the inner workings of other venture funds. And, as more public or tax-players ' money flows into this asset class, it begs a shift from the existing esoteric styles to more transparent and predictable operations. It would also be beneficial if the craft of venture capital is well understood by the business community and most importantly, policymakers as Demystifying Venture Capital: How it works and How to get primarily written to address these concerns, and to explain the subject in a nontechnical manner, as far as possible. A handbook for fund managers, startups, academicians interested in the subject, policy makers, and aspiring entrepreneurs, this book is unique as it has been written along with the top 25 venture funds in India as co-authors. The first part builds the concepts and theoretical framework of venture investing throughout the venture capital life cycle, giving readers a robust academic backdrop while the second part offer 25 first-hand accounts of how VCs invest, where they invest, what they look for while investing, providing invaluable insights into the minds and methods of VCs. All in all, this prototype is a first-of-its-kind endeavour to deliver a 360-degree + view of the Venture Capital universe.

Born in 1960 at Agra and brought up in Kanpur. Schooling in Methodist high school. Worked 10 years with MNC-ITC-Ltd. Worked 5 years with Mc Dowell ' s ltd. Worked 4 Years as General Manager in a 5 Star hotel in Kanpur. Have work experience in South Africa, Kenya, Uganda, Tanzania and Zimbabwe. Total Work experience- 40 years. Have given more than 5000 Workshop and Seminars on " ART OF EXCELLENCE " . Experienced, dynamic, energetic personality and hard working. Result oriented, quality driven performance and self motivated. Passionate in his work. Expert on Attitude Teaching Founder President of 2 NGOs

Psychiatry is arguably the most misunderstood specialty in modern medicine and psychiatrists are often thought of as part physician, part confessor, part police officer, and part shaman. In Demystifying Psychiatry, two eminent psychiatrists offer an illuminating look at the entire field, offering a clear and informative portrait of a medical specialty often clouded in myth. Zorumski and Rubin range from a basic discussion of what psychiatry is, to the types of illnesses psychiatrists treat, the training of psychiatrists, the treatment of psychiatric disorders (covering medications, psychotherapy, lifestyle interventions, electroconvulsive therapy, and much more), and how families can help with treatment. They caution the consumer about practices that should raise red flags. The book also covers new trends in psychiatry and explores the future of the field, predicting that major advances in genetics and neuroscience will lead to rapid and amazing changes in psychiatry. The book concludes with extensive reference materials that will be valuable both to general readers and medical practitioners.
