"This book focuses on the multiple and interconnected manifestations of violence that women/girls encounter in tourism consumption and production while seeking to open the debate on violence against sexual minorities (LGBT) and discussing men/boys as victims and perpetrators of GBV"--

This edited book brings together the voices and insights of survivors, practitioners, educators and researchers working to prevent and minimise the harms of gender-based violence, with a specific focus on equipping health professionals and social workers to support victim-survivors. Practitioners can, and often do, play a critical role supporting victim-survivors of gender-based violence; however, this work has historically been carried out by those in specialist roles and there remains gaps and inconsistencies in education and training for qualifying and post-qualified professionals. This book makes a valuable contribution to addressing these gaps. It provides practitioners with a

comprehensive resource on contemporary debates and research in the field of gender-based violence. To support readers' learning, each chapter contains reflective exercises and draws clear links between research, theory and practice. The book is structured into four sections. The first section considers the 'rise' of gender-based violence in policy and practice, and questions to what extent this once marginalised perspective has become embedded in health and social work training and education. The second section of the book explores some of the expressions, contexts and implications of gender-based violence. Each chapter considers the role of health care professionals and social workers and invites the reader to reflect on their (potential) role in these areas. The third section of the collection focuses on one of the most common forms of gender-based violence that health and social work professionals are likely to encounter: physical, psychological, sexual and financial violence by an intimate partner, who may also be a parent. Finally, the fourth section showcases innovative responses to supporting victim-survivors and challenging systems that contribute to gender inequality. The intention of this book is to equip health care professionals and social workers with critical, practical and ethical resources to help them work with victim-survivors and, where possible, engage in transformative efforts to end the harms of gendered inequalities and violence.

This book is an accessible guide to caring for survivors of sexual and gender-based violence (SGBV). Sexual violence is broadly defined in order to include sexual assault, but also often forgotten subjects such as female genital cutting, sex trafficking, and military sexual violence. The average practitioner, gynecologist or otherwise, will undoubtedly encounter a victim of some sexual violence during their time in practice and this guide is designed to answer all questions on how to approach, treat, and understand a survivor of sexual violence. Written by a multidisciplinary team of medical, psychological, and legal experts, the book is organized into four sections. The first section begins with a scholarly analysis of trauma and how to discuss that trauma with patients. The second section covers types of violence and populations at risk, including intimate partner violence, sex trafficking, and LGBTQ considerations. The third section provides critical focus on the examination procedure, providing strategies for speaking to survivors and conducting a sensitive medical examination. Within each of these chapters, the reader will find experts sharing their tips, best practices, and understandings of exactly how trauma affects care. The final section covers medicolegal legal issues, providing a basic introduction to general legal processes regarding sexual violence matters in the US in order to serve as a resource for any practitioner presented with legal questions by a patient. This book gives a comprehensive overview of clinical care for survivors of SGBV. The clinical focus of this book goes beyond emergency room and crisis intervention protocol described in other books and makes it an ideal guide for all general health practitioners treating this population.

Applying Anthropology to Gender-Based Violence: Global Responses, Local Practices addresses the gaps in theory, methods, and practices that are currently used to engage the problem of gender-based violence. This book complements the work carried out in the legal, social work, and medical fields by demonstrating how a focus on local issues and local responses can better inform a collaborative global response to the problem of gender-based violence. With chapters covering Africa, Asia, Latin and North America, and Oceania, it provides ample evidence that richly textured and qualitatively informed research can illuminate work that is more quantitative in scope. The volume illustrates the various ways scholars, practitioners, frontline workers, and policy makers can work together to end forms of violence in their local communities. The chapters in this volume demonstrate that the ways top-down responses to violence have been inadequate, and that solutions are available when the local historical, political, and social context is taken into consideration. Applying Anthropology to Gender-Based Violence contains useful insights that, when combined with the efforts of other disciplines, offer solutions to the problem of gender-based violence.

All companies rely on committed and loyal employees to reach their goals. However, we know little about how exactly the mechanisms of leadership influence the job involvement of employees. This study focused on the established leadership model of lateral leadership by investigating the underlying forces of lateral leadership and developed a practical recommendation for its use. We empirically demonstrated which forces constitute the base of the lateral leadership model, how they interact with each other, and how much impact the forces have on the performance variables of job involvement and organisational commitment.

Worldwide, patterns of violence against women differ markedly from violence against men. For example, women are more likely than men to be sexually assaulted or killed by someone they know. The United Nations has defined violence against women as "gender-based" violence, to acknowledge that such violence is rooted in gender inequality and is often tolerated and condoned by laws, institutions, and community norms. Violence against women is not only a profound violation of human rights, but also a costly impediment to a country's national development. While gender-based violence occurs in many forms throughout the life cycle, this review focuses on two of the most common types-physical intimate partner violence and sexual violence by any perpetrator. Unfortunately, the knowledge base about effective initiatives to prevent and respond to gender-based violence is relatively limited. Few approaches have been rigorously evaluated, even in high-income countries. And such evaluations involve numerous methodological challenges. Nonetheless, the authors review what is known about more and less effective-or at least promising-approaches to prevent and respond to gender-based violence. They present definitions, recent statistics, health consequences, costs, and risk factors of gender-based violence. The authors analyze good practice initiatives in the justice, health, and education sectors, as well as multisectoral approaches. For each of these sectors, they examine initiatives that have addressed laws and policies, institutional reforms, community mobilization, and individual behavior change strategies. Finally, the authors identify priorities for future research and action, including funding research on the health and socioeconomic costs of violence against women, encouraging science-based program evaluations, disseminating evaluation results across countries, promoting investment in effective prevention and treatment initiatives, and encouraging public-private partnerships.

This book establishes a nexus between corruption in public procurement and the prevailing crisis of governance in Africa. The African continent is characterised by the growing concern for the deteriorating human security. In the midst of these woes, African political leaders are known for their stupendous wealth and riches through expropriation of national resources for personal benefits. This growing inequality in the continent has become a major driver for a series of violent and criminal activities, which have added to the worsening governance crisis. Thus, the abuse of public power for advancing private gain constitutes an impediment to effective public service delivery, thereby engendering a crisis of governance. The consequence of this is not limited to the socio-economic growth and welfare of citizens, but it often also jeopardizes the democratic credentials and objectives of the state.

Academic Paper from the year 2019 in the subject Gender Studies, University of Nairobi (ODEL Campus), course: Project Planning and Management, language: English, abstract: The purpose of this study is to analyze the influence of NGOs initiatives on management of gender based violence projects in public primary schools in Ndhiwa Sub County (Kenya). The study is guided by specific objectives. To establish the extent to which Support Group influence management of gender based violence, to determine how dissemination of information through digital platform influence management of gender based violence. And to examine the level at which sports development influence management of gender based violence and to determine how external factors moderate relationship between NGOs initiative and management of gender based violence in public primary schools in Ndhiwa Sub County. The research is inclined to social learning and performance failure theories. The study adopted descriptive survey research design, collected and analyzed both qualitative and quantitative data. The study's target population was 6000 respondents drawn from twenty public primary schools that have NGOs implementing gender based violence initiative projects. A sample size of 380 respondents was determined using Krejcie & Morgan table of 1970. The respondents were selected using proportionate allocation of the sample to all schools and systematic random sampling techniques. Data collection instruments comprised both self-administered questionnaire

with a return rate of 95% and interview schedule for the NGO Project Managers and teachers at the schools. Pilot testing was conducted in Migori town to determine construct and content validity of the research instruments. The prevalent rate of gender violence in Kenya is a major concern. About 36 percent of women who have experienced gender violence, the first experience of violence occurred at age 15-19. Schools are no longer the safe spaces that were considered to be as most of the violence is meted on children while they are either in school or the journey to and from school. It is against this backdrop that many organizations have tailored their programs around school related gender based violence with the key intention of reducing the prevalent rate, encourage school retention and improved academic performance.

Founders and Organizational Development: The Etiology and Theory of Founder ' s Syndrome is designed to help today ' s researchers, faculty, students and practitioners become familiar with the etiology and dynamics of Founder ' s Syndrome as an organizational condition challenging nonprofit/nongovernmental, social enterprise, and for-profit and publicly traded organizations. The book uses applied social and psychological theories and concepts to peel away the layers of an organizational enigma, revealing three causes of Founder ' s Syndrome and insight into the power and privileges assumed by founders who engage in undesirable and self-destructive behaviors leading to their termination; going from hero status to antihero. Researchers, instructors, students, and practitioners will find thought-provoking case studies from the real world of organization development practice. Segments from interviews during interventions reveal the type of emotional turmoil experienced in organizations where founder ' s syndrome is present. Insight is provided into accounts of well-known founders who were terminated or forced to resign. The unique features of this book include: integrating theory into practice, describing a new theory about the psychological reaction of founder ' s syndrome victims, prevention ideas when designing new organizations, strategies for intervention, using content based on research and organization development consultation experiences, and, integrating feedback from students who have launched organizations.

Global society has always been impacted by the perception of gender. While gender roles may differ in certain cultures, many cultures around the world have allowed for the disempowerment and objectification of women. Women today still struggle for gender equality whether it be professionally, socially, or even legally. To examine feminism thoroughly, however, thorough analysis must be conducted on all genders and perceptions. The Research Anthology on Feminist Studies and Gender Perceptions explores the application of feminist theory and women empowerment in the 21st century and the role that gender plays in society. This book analyzes media representation, gender performativity, and theory to present a comprehensive view of gender and society. Covering topics such as masculinity, women empowerment, and gender equality, this two-volume comprehensive major reference work is an essential resource for sociologists, community leaders, human resource managers, activists, students and professors of higher education, researchers, and academicians.
