Reflecting the highly globalized nature of tastes, production, labor markets, and financial markets in today's world, Managerial Economics in a Global Economy is ideal for undergraduate and MBA courses in managerial economics. Adopting a thoroughly global perspective, this text synthesizes economic theory, decision science, and business administration studies, examining how they interact as a firm strives to reach optimal profitability and efficiency in the face of modern constraints.

This text uses the theory of the firm to integrate and link economic theory (microeconomics and macroeconomics), decision sciences (mathematical economics and econometrics), and the functional areas of business (accounting, finance, marketing, personnel or human resource management, and production) and shows how all of these topics are crucial components of managerial decision making. The text is divided into five parts-Part I examines the nature and scope of managerial economics, Part II analyses demand, Part III presents the theory and measurement. It covers the full range of optimization techniques used in managerial decision making. The book offers extensive end-chapter material in the form of the summary, discussion questions, problems, chapter appendixes along with appendix problems, supplementary readings, and Internet site addresses. This seventh edition includes new sections, new case studies, some of which are India based, and five new longer Indian integrated case studies. In addition, the existing case studies, supplementary readings, and Internet site addresses have been revised.

Dominick Salvatore once again offers you an opportunity to provide an international perspective to your managerial economics course in his latest edition of the popular Managerial Economics in a Global Economy. Salvatore unifies the theme of managerial decision making around the theory of the firm. This edition offers 28 new case studies and several new chapters that will allow you to present the most current and exciting coverage available in a managerial economics text.

International Economics, 13th Edition provides students with a comprehensive, up-to-date review of the field's essential principles and theory. This comprehensive textbook explains the concepts necessary to understand, evaluate, and address the economic problems and issues the nations of the world are currently facing, and are likely to face in the future. Balancing depth and accessibility, the text helps students identify the real-world relevance of the material through extensive practical applications and examples. The new, thoroughly-updated and expanded edition provides students with a solid knowledgebase in international trade theory and policy, balance of payments, foreign exchange markets and exchange rates, open-economy macroeconomics, and the international monetary system. Topics include the "Great Recession," the increase in trade protectionism, excessive volatility and large misalignments of exchange rates, and the impacts of resource scarcity and climate change to continued growth and sustainable development.
