ISO is the exposure setting that I always set first. When you first started as a manual shooter, ISO was mostly about what kind of light you would find at your shooting location. After a while, you found out that there is more to it than just the brightness of the light. It is also a tool for correcting exposure when other settings need a bit of help.

~~Intermediate Exposure Guide for Manual Mode Photography~~

Switching to manual mode prevents that from happening. The advantage of manual mode is that once you have determined the optimum exposure settings, you can set the ISO, aperture and shutter speed and keep them the same until the light changes (or you want to alter them for creative reasons). Manual mode works best when the light levels are steady.
