Before achievement test scores can be useful to educators, however, they need to be evaluated within a coherent interpretive context. The 2020 NWEA MAP Growth norms can provide one source of context. For example, the 2020 MAP Growth norms allow educators to compare achievement status—and changes in achievement status (growth)—to students ' performance in the same grade at a comparable ...

In the 2020 norms, only effortful test scores (i.e. 10% or fewer rapid guesses) were utilized. By removing non-effortful scores from the sample, “ noise ” is removed from the data which leads to a more clearly defined target population for achievement and growth norms. This is an important change, given that high rates of student rapid guessing can bias student achievement estimates, often ...
