School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and

school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. Overcoming School Refusal helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school refusers
- why children

Two young women, with intertwined
fates centuries apart, must protect the
secret of the powerful, all-healing
mushroom known as amakuna • The
gripping story includes mystical
visions, shamanic rituals, past lives, an
ancient lineage of medicine women,
love, betrayal, conspiracies, and
murder • Set concurrently in modern
times and in 1492 during the
Conquistadors' takeover of the
Canary Islands 1492: For millennia,
the medicine women of the Guanches,

the indigenous people on the Canary Island of La Palma, have used a psychotropic mushroom to look into the past and the future. But the mushroom has other sacred powers: It can cure disease or injury and it links the fate of those who consume it across all eternity. These secret powers are closely guarded by the medicine women, for they can foresee the destructive forces that would be unleashed if the sacred mushroom fell into the wrong hands. Present day: Romy, a young doctor at a biomedical research company, sets out alone on a rock-climbing trek near her home in Germany. Halfway through her climb, an unusual panic overtakes her and she blacks out as she falls more than 25 feet from the face of a cliff Coming to, hours later, she finds herself in a cave, remarkably

unscathed, with a strange taste in her mouth as well as a vivid recollection of an ancient ritual centered on a sacred mushroom called “amakuna.”

Plagued by visions from the amakuna ceremony, including the death of an old medicine woman under a peculiar looking tree and the appointment of a young apprentice, Iriomé, to take her place, Romy begins to feel as if Iriomé is trying to contact her across the centuries. Identifying the tree from the visions as a Canarian Dragon Tree, she heads to the Canary Island of La Palma to discover the truth behind her visions and her and Iriomé’s intertwined fates. In the heart of the island’s volcanic crater, she discovers the reality of the strange mushroom and its magical, all-healing, all-seeing powers. She brings some of the mushroom back to Germany and

experiments with it, leading to repeated flashbacks of Iriomé's life. But pharmaceutical mega-corporations are already in hot pursuit of her and will stop at nothing to take possession of the amakuna--not even murder. As Romy and Iriomé's lives continue to parallel across the centuries, they both find themselves in love with powerful men, pregnant, far from home, and in danger. But while Iriomé's fate is in the past and sealed, Romy's has not yet been decided, nor has the fate of the mushroom, which she learns has the power to either destroy life or preserve it. Will Romy be able to protect the powerful amakuna secret, as generations of medicine women have done before her? Or will she fall victim to betrayal as Iriomé did, and be forced to destroy the sacred mushroom before it can destroy the

Many of the world's islands are dependent on tourism as their main source of income. It is therefore imperative that these destinations are managed for long-term viability. The natural appeal of a destination is typically one of its main tourism related assets, yet the natural environment is also the feature most directly

threatened by potential overexploitation. Sustainable Tourism in Island Destinations builds on existing literature in the subject by providing innovative discussions and practical management structures through the use of the authors' various island project work. An original feature is the focus on islands which are part of larger nations, rather than just on island sovereign states. Through an illustrated case study approach, the book focuses on the successes and challenges islands face in achieving sustainable tourism. The authors put forward innovative mechanisms such as multi-stakeholder partnerships and incentive-driven non-regulatory approaches as ways that the sustainability agenda can move forward in destinations that face specific challenges due to their

geography and historic development. The case studies - from Canada, St Kitts, Honduras, China, Indonesia, Spain, Tanzania and Thailand - provide the foundation which suggests that alternative approaches to tourism development are possible if they retain sustainability as a priority.

Thirty of the world's most talented architects, including Norman Foster, Thom Mayne, Tod Williams and Billie Tsien, talk about the houses they designed for themselves over the past decade in Architects' Houses. What inspired them, what were the constraints, how did their concepts take shape? Michael Webb explores the creative process and traces the influence of architects' houses over the past two hundred years, from Jefferson's Monticello to the creations

of Charles and Ray Eames, Toyo Ito, and Frank Gehry. Texts, sketches, and plans illustrate houses that differ widely, in size, material, character, and location. Spacious or frugal, ambitious or modest, refined or rough edged, daring or reductive, these adventurous dwellings make a statement. This generously illustrated book brims with ideas and inspiration as these architects' houses show different answers to the question: how can a house enrich lives and its natural surroundings?
